Disposable Electrical Knife

Ball Type | Cylindrical Type Square Knife | Triangle Tip Type Rotatable | Cylindrical Type Tunnel Knife | Hook Type Rotatable

Product Features

- Available in various specifications, suitable for different gastrointestinal locations and types of surgery.
- Slim outer tube: enhances attraction effect, providing a clearer view under the microscope.
  Smooth entry and exit through the forceps channel, easily reaching various tortuous anatomical structures.
- The length of the cylindrical tip small needle of the cylindrical incision knife can be adjusted (0-2mm), suitable for POEM surgery.
- The ceramic head with a cut-open insulated tip ensures the safety of cutting and stripping.
- A conical incision knife is used for lesions that are difficult to cut; the conical shape can grasp the tissue, making cutting easier and faster.
- Recommended power for mucosal incision : **ENDOCUT Q : 3-3-3 (Effect 3 / Cutting width 3 / Cutting interval 3)**

Colonoscopy (Rotatable) | Gastroscopy (Rotatable) | Colonoscopy (Non-Rotatable) | Gastroscopy (Non-Rotatable)

Product Features

- The width can be selected from **10mm, 15mm, 20mm, 25mm, 30mm, 35mm.**
- This product is made of imported high-strength stainless steel wire, with good stability and resistance to deformation, while also featuring very fast electrosurgical cutting speed and good electrocoagulation effect, ensuring the safety and efficiency of surgery.
- There is a rotatable type, with the handle and loop able to rotate synchronously, improving surgical efficiency and saving time.
- After retracting the trap, the outer tube completely encloses the trap, effectively preventing unnecessary trauma and reducing damage to the endoscope wall.

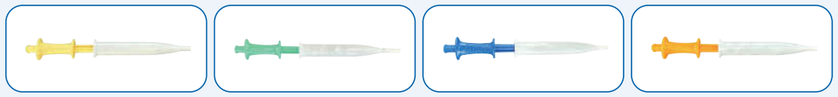
Disposable Injection Needle

Handle



Needle Diameter: 19G | Needle Diameter: 21G | Needle Diameter: 23G | Needle Diameter: 25G

Product Features

- Various needle length specifications are available: **the standard lengths are 4mm, 5mm, and 6mm.**
- The outer sheath is made of Teflon, making it smoother.
- The needle tip has a rhomboid cross-section, making it sharper when penetrating tissue, effectively preventing unnecessary trauma.
- The handle has a snap design to effectively control the needle length, making operation safer.

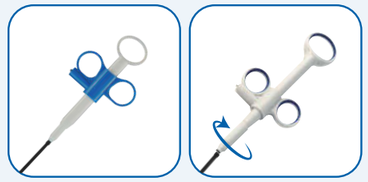
Disposable Hot Biopsy Forceps

Handle



Non-Rotatable Rotatable

Product Features

- It can perform electrocision and electrocoagulation simultaneously, used for polyp removal, performing the most difficult biopsies, with minimal tissue damage.
- The clamp head is smooth, with an intact and sharp edge, allowing for accurate and rapid tissue cutting, improving surgical efficiency, avoiding unnecessary tissue removal, and reducing wound size.
- There is a high-performance model with an ultra-smooth coating, effectively reducing wear on the clamp path and making surgical operations smoother.
- The haemostatic forceps cup easily clamps the wound surface, and electrocautery and electrocoagulation proceed smoothly during surgery, without any stuttering.

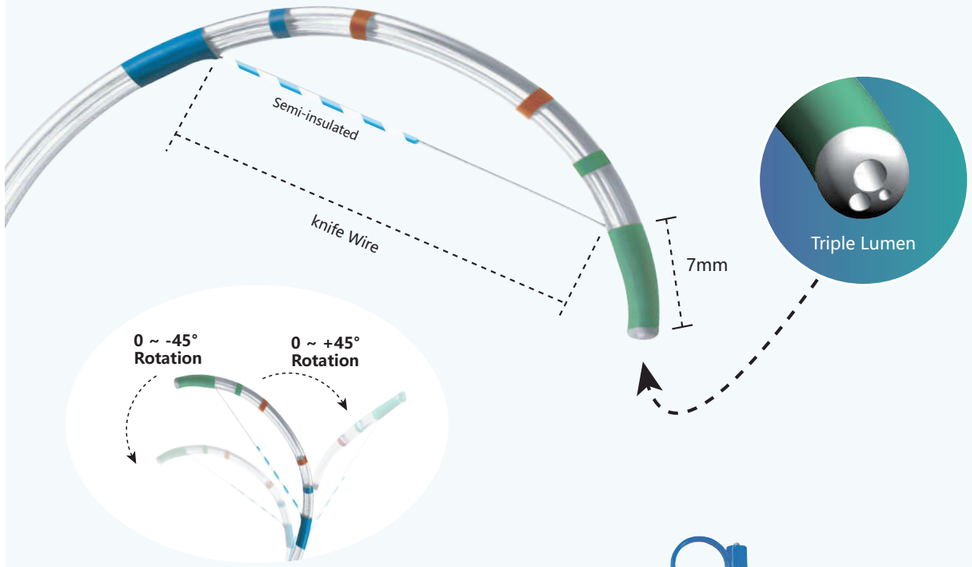
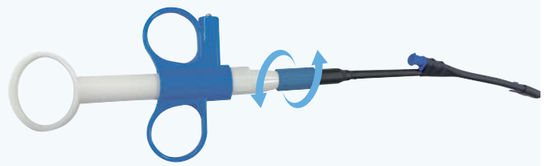
Disposable Sphincterotome





Product Features

- **Double Lumen and Triple Lumen options are available.**
  In the Triple Lumen type, the guidewire and contrast agent have separate channels, which makes imaging clearer during operation and allows for accurate positioning.
- **The Knife Wire is semi-insulated,**
  and the semi-insulation reduces the cutting force of the Knife Wire to prevent excessive cutting.
- The blade developer stains and can be visualised under endoscopic ultrasonography.
- The Knife Wire is made of stainless steel, sharp, strong and durable, allowing for quick incision during surgery, reducing operation time and improving surgical efficiency.
