Product Overview for Veterinary

For Veterinary

Company Profile

Established in 2011. Headquartered in Shenzhen, China.

Browiner is one of the leading global digital radiography manufacturers committed to mobility, minitype, and intelligence technology innovation.

We hope to provide more convenient, more efficient, and more accurate X-ray imaging diagnoses through a comprehensive range of solutions, including mobile X-ray systems, portable X-ray systems, fixed X-ray systems, mobile C-arm systems, dynamic X-ray systems and DR upgrade solutions.

With installations in over 100 countries and regions, we keep delivering high-quality products, professional services, and excellent health care to the world.

Nurtured by innovation and excelling in quality, Browiner will continue its endeavor to protect life.

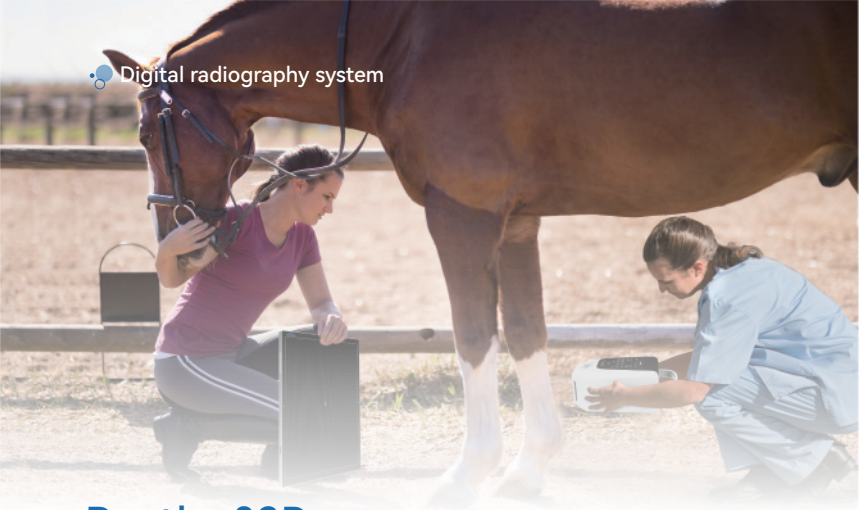

Installed countries and regions

100+

- Professional training
- Remote technical support
- 7×24 hours online support
- Regular customer visits

ISO13485 ISO9001 ISO14001 ISO45001 CE 0123 FDA IPMS

Beatle-02P

Lightweight portable X-ray system

The Beatle-02P is the ideal solution for mobile veterinary X-ray applications due to its compact body, easy operation, and internal battery power supply.

- Extremely lightweight body is easy to transport
- Wireless solution delivers more freedom during positioning
- The internal battery allows for outdoor radiography
- A larger interface for easy control to enhance efficiency

Beatle-06P1 Vet-S

High power portable X-ray with battery

This portable X-ray system offers maximum mobility thanks to its lightweight and simple assembly, which also makes it suitable for animal imaging in any situation.

- 5.6 kW high output power guarantees outstanding image quality
- Foldable stand permits flexibility in imaging even for huge animals
- 8-inch touch screen with APRs makes easy access to imaging
- Li-ion battery power supply allows exposure in different scenes
- Carrying case packaging allows safe transport and storage

Beatle-06P1 Vet-T

High-efficiency X-ray imaging

This system features high operability and excellent image quality to offer X-ray imaging for animals with more comfort and efficiency.

- 5.6 kW high power to satisfy diverse clinical requirements of animals
- Four-way floating tabletop provides a large range of movement
- Load-bearing is up to 200kg, suitable for large-weight animals
- 8-inch capacitive touch screen with APR settings
- Intelligent vet-specific software facilitates operation and superior images

VX200/VX400

Integrated X-ray system with image workstation

High power output guarantees excellent image quality for any type of pet while instant imaging permits greatly efficient workflow.

- 20/32 kW power output to fit any animal's radiographic needs
- Four-way floating tabletop extends imaging coverage
- Tube head touchscreen can achieve the whole exposure procedure
- Images on tube head enable instant communication with animal owners
- Advanced image post-processing allows more accurate diagnoses

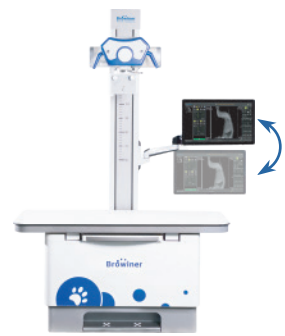

VX400 DRF

This compact unit integrates a wide range of applications in one room, including digital radiography, digital fluoroscopy and contrast studies, maximizing efficiency for increased productivity.

- Adjustable SID ensures complete imaging coverage for animals of different sizes

- A large-size touchscreen allows for full control of exposure
- Flexible movement of the touchscreen offers better observation

- The four-way tabletop with a wide travel range providesextensive coverage

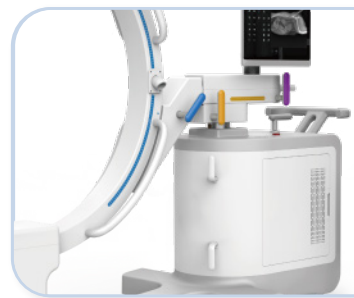

CompaX 500 Vet

This vet surgical C-arm features a comprehensive range of advanced imaging modes tailored to various vet applications.

- Large C-arm geometry delivers more surgical space

- Color-coded axis and handle allow easy and efficient maneuvering of C-arm

- Compact structure can achieve effortless movement as needed
