CRYO IQ
Innovative cryosurgery

Wart free feet

MADE IN SWEDEN

CRYO IQ
The intelligent cryosolution

Cryotherapy in the Podiatric practice

Cutaneous cryosurgery in the Podiatric practice refers to the localized application of freezing temperatures to achieve a controlled destruction or removal of skin lesions on the foot, such as plantar warts and granulation tissue.

CryoIQ® are advanced, portable, compact, handheld cryosurgical devices which delivers the fine spray with pinpoint accuracy to lesions at a constant freezing temperature of -89°C / -127°F with a 50 bar (725 psi) freezing power. A skin lesion treatment with the state of the art CryoIQ® is fast, safe, effective, low-cost, with no anesthetics needed.

The very affordable instrument either uses a fixed applicator for the most common treatment options or offers the choice of a wide range of applicators to be used for a more extensive variety in treatment options.

The CryoIQ® uses disposable nitrous oxide cartridges which allow the practitioner to have the device readily available for use at all times, hassle-free, no pre-treatment preparation time needed as required with the use of canisters, liquid nitrogen and other modalities.

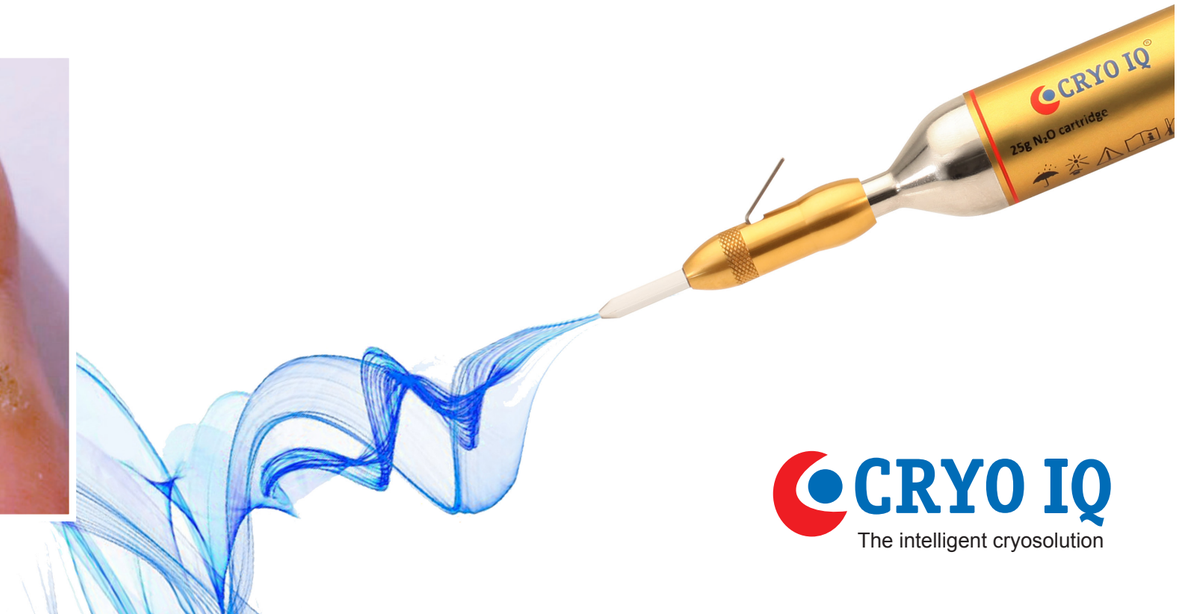

The CryoIQ® innovation in cryotherapy makes it possible to treat a broad range of benign conditions such as, but not limited to:

- Actinic Keratosis
- Genital lesions
- Lentigo
- Molluscum Contagiosum
- Seborrheic Keratosis
- Skin Tags
- Verruca Plana
- Verruca Plantaris
- And more….

The advantages of incorporating the intelligent cryotherapy solution of CryoIQ® in your practice:

- Low cost per treatment, low investment for the device
- No pain involved due the combination of accuracy, freezing temperature and freezing power
- Fast, effective treatment in a busy practice environment
- Portable, compact to bring to multiple treatment settings
- No preparation time needed
- Anesthesia optional, not required
- Excellent cosmetic results
- Safe procedure
- Low risk of infection
- No bleeding

CryoIQ DERM Plus

The CryoIQ DERM Plus has a fixed applicator capable of accurate liquid spray freezing of skin imperfections with no destruction of adjacent healthy tissue.

The device offers the possibility of contact freezing through a fixed contact applicator with predetermined surfaces of 1, 3 or 5 mm.

CryoIQ PRO

The CryoIQ® PRO has 4 interchangeable applicators for liquid spray freezing with a surface coverage of 1-22 mm. The device offers also a choice in specialty applicators such as the mm 130mm long applicator and the 45° angled applicator. The CryoIQ® PRO is the most versatile instrument for the treatment of a large variety of skin imperfections.

Both products works with 25 gram nitrous oxide (N_2O) cartridge.
