Endoscopic Flushing Pump

SFP-1

SFP-1

SFP-1 is a powerful Endoscopic Irrigation Pump in SonoScape's endoscopy solutions. The saline or sterile water is allowed to pump into the patient's body cavity by SFP-1, which help with rinsing tissues to remove blood, bubbles, faeces and other organic substances, improving the clarity of the field of vision during the endoscopic diagnosis and treatment.

Flexible flow adjustment

Multiple level pumping, 270ml/min as maximum, pump in real time without any delay.

Convenient and swift operation

Operates via foot switch to smooth the procedure.

Safe operation provision

Single water pumping duration is 20 second, avoid misoperation.

Allows for the quick and safe exchange of water channel tubes without turning off the device.

When the head pump is loose, the device will give out voice (3s) and twinkle light.

Flexible flow adjustment

Compact and light-weight design offer easy transportation and placement.

LED light indicator for clear vision even in a narrow space.

Specification	
Maximum flow rate	270ml/min
Net weight	5.1kg
Dimensions	24.6cm(width)×17.7cm(high)×39.3cm(depth)
Water supply pressure	400kPa
Water container capacity	2L
Power condition	
Power Supply	100~240V
Frequency	50/60Hz
Power Rating	60VA
