SHELTER POWER ASSISTED STRETCHER

INTRODUCTION

·Specially designed x support, no power supply is needed when descending
·Fast leg retraction function, Twice the speed of conventional electric stretcher
·Specially designed HLS hydraulic system ensures stable and comfortable lifting.
·Bosch double lithium battery
·Carbon fiber battery box, high strength, effective protection of battery, insulation and leakage prevention, reducing stretcher weight
·Steering positioning function, easy to operate in narrow space.

·Multi-gear guardrails increase the width of the stretcher
Suitable for patients of different body types

·Pan up, down,left, and right

·Emergency descent handle

·Night rescue warning light

·Electric lifting panel

·Rubber universal roller

Model	Item Code	Product Size	Folding Size	N.W/G.W	Loading Capacity	Outside Carton	Material
Shelter Power Assisted Stretcher	DJSC0006	2050×550×1220mm	2050×550×400mm	93KG/98KG	280Kg	/	Aluminum

AMBULANCE STRETCHER

INTRODUCTION

·Made of high-strength steel and used in conjunction with ambulances, it facilitates and safely transfers patients.
·Reasonable structure, able to adjust the height of guide wheels through catheters, meeting the needs of different models of ambulance chassis.
·No need to operate the handle, only one person can conveniently get on and off the vehicle, improving efficiency.

·Built with steel.
·Front roll in wheels can be changed in height.
·No need for operating handle, Centering blocking device can protect whole stretcher from falling down.

Model	Item Code	Product Size	Folding Size	N.W/G.W	Loading Capacity	Outside Carton	Material
Ambulance stretcher	DJSC0013	1985×545×925mm	1985×545×310mm	38.5KG	250Kg	/	Steel Alloy

CR-17

INTRODUCTION

CR-17 Chair-Stretcher provides maximum versatility in confining environments. It transforms from a stretcher to a chair so you can easily maneuver through tight hallways, narrow staircases, and small elevators, without transferring the patient.

It's light-weight, superior stability, load capacity, and flexibility make it easy to handle in any situation.

CR-18

INTRODUCTION

CR-18 provides exceptional stability and safety when transferring and transporting patients. A longer, fixed front leg in the X-Frame, a rigid C-channel running the length of the stretcher, and carefully engineered geometry create a low center of gravity and minimal flex. The enhanced stability reduces the chances of tips or flips.

CR-21

INTRODUCTION

There are two rectangular holes in each side of CR-21 auto loading ambulance stretcher, with the help of these 4 opening holes, there's one yellow or grey color plastic bumper fixed to each legs, they will prevent the legs to hit the stretcher too hard when loading into ambulance, extend the using life of Pure-Life auto loading ambulance stretchers.

CR-1A

INTRODUCTION

This stretcher platform is suitable for ambulance car, it is designed for convenient up and down of the ambulance stretchers. Made of high-strength aluminum alloy material, scoop stretcher or spine board can be deposited in the bottom.

Model	Item Code	Product Size	Folding Size	N.W/G.W	Loading Capacity	Outside Carton	Material

CR-H1

The stretcher is made of high-strength aluminum alloy materials. It is an ideal equipment for emergency staff to transfer patient to go up and down stair. Two stationary rear wheels enable the patients to be moved over most surfaces with minimal effort. It enhances the patient's safety during transport process.

CR-H3

The stretcher is mainly used for transfer the patient up and down from stairs, or other narrow areas. It is made of high-strength aluminum with four wheels. The surface is made of leather fabric which can be take down for the zipper on back. The back of the stretcher designed with four folded handles, can make sure patient's safety.

CR-H5

It is easy to maneuver and get you in and out of cramped quarters. Two 5" stationary rear wheels roll over most surfaces with minimal effort. Telescoping, two-position front handles allow the foot-end to maneuver the patient without interfering with the patient´s feet.

CR-F13

- Heavy duty.
- vinyl-coated nylon cover.
- Features lightweight aluminum frames and heavy duty, bacteriostatic, vinyl-coated nylon covers.
- Includes patient restraints.

CR-F16

- Made of sturdy aluminum poles.
- Double fold lengthwise and crosswise for compact storage & easy transportation.
- Durable, vinyl-coated nylon cover resists stains and will not absorb blood or bodily fluids.
- Nonslip handgrips for firm control while handling.

CR-F21

- Vinyl-coated nylon cover , Includes patient restraints.
- Features folding head-end posts and folding foot-end wheels
- Folding head-end posts double as lift handles and support legs and fold underneath the stretcher for storage

CARBON FIBRE SCOOP STRETCHER

INTRODUCTION

This product is made of carbon fibre,very light and strong， about 4kgs and Loading Capacity 250kgs.
The length can be adjusted. It is equipped with safety belts,can be used for X-ray, MRI and CT.
Head immobilizer can be separated and fixed on the stretcher directly, it can save time during rescue, and also save space for stocking.

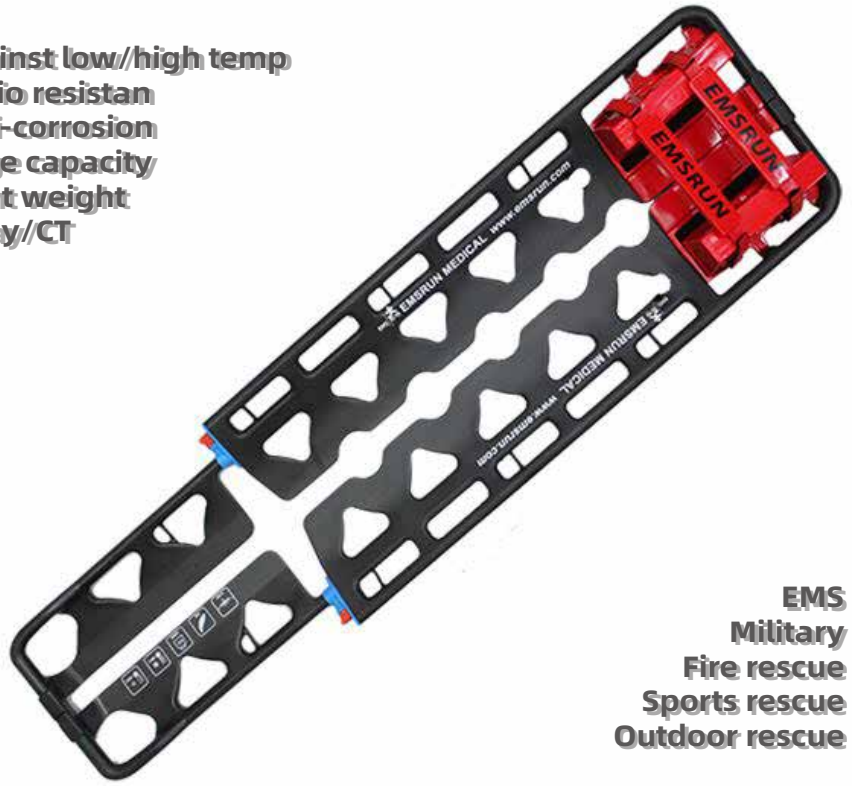

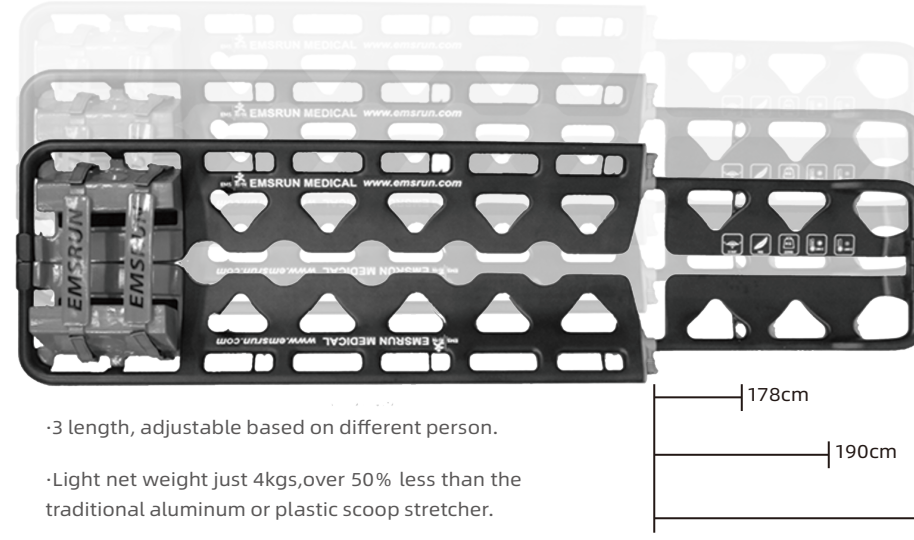

Against low//high temp
Radio resistan
Anti-corrosion
Huge capacity
Light weight
X-ray//CT

EMS
Military
Fire rescue
Sports rescue
Outdoor rescue

·3 length, adjustable based on different person.

·Light net weight just 4kgs,over 50% less than the traditional aluminum or plastic scoop stretcher.

Model	Item Code	Product Size	Folding Size	N.W/G.W	Loading Capacity	Outside Carton	Material
Carbon Fibre Scoop Stretcher	DJCS0007	1650×440×65mm	1770×440×65mm	4KG/4.2KG	220Kg	1780×440×65mm	Carbon Fibre

CR-S10

Scoop Stretcher eliminates the need for log-roll maneuvers, which significantly decreases movement to the cervical spine. It is also ideal for hip injuries and for accident victims found on the street. Includes three burgundy or black restraints. Available with or without pins.

CR-S12

It allows for safe, easy extrication of injured patients. Its updated version further improves the inimitable 2-in-1 design of the original, and brings it fully up to date with a thinner, lower profile, allowing the whole board to fit inside all standard storage compartments.

CR-S13

Produced in plastic could be used with X-Ray,specially designed to be placed underneath the injured (broken back bone etc.)
It has a secure open/close device and a regulated length easy lock system.The contoured surface is specially made to reduce any eventual movements of the patient during transportation.

CR-J01

This spine board with safety belts is made of durable PE material with no discharge contaminator, and is resistant to wear. It is a folding device, and is X-Ray translucent. This model is compatible with most head immobilization devices and strap mechanisms. Can be used for safe patient handling in the event of an accident.

CR-J03

Spineboard made of HDPE special plastic with 14 surrounding handles, weight 6.2 kg, extremely resilient, buoyant, lets through X-rays and is MRI / CT compatible, wipes and disinfectable.

CR-J07

This spine board with safety belts is made of durable PE material with no discharge contaminator, and is resistant to wear. It is a folding device, and is X-Ray translucent. This model is compatible with most head immobilization devices and strap mechanisms.

CR-R01

The stretcher is made with vinyl coated high tenacity orange fabric and heavy duty mesh. The mesh allows water to drain away from the casualty as they are being recovered, which aids manual handling and speed of recovery.

Can also be used as a twin to recover casualties and bodies in offshore conditions. Two stretchers are joined together with buckles to roll casualties into small recuse vessels.

CR-R02

The stretcher is made with vinyl coated high tenacity or range fabric and heavy duty mesh using High frequency welding with no stitching. The mesh allows w water to drain away from the casualty as they are being recovered, which aids manual handling and spe eed of recovery.

The stretcher can also be used as a twin to recover casu alties and bodies in offshore conditions. Two stretchers arejoined together with buckles to roll casuall cies into small recuse vessels.

CR-V1

Utilizing PU, PVC, EVA and new plastic materials in combination with high frequency welding are the main factors in maintaining and improving lightweight, easy to use and wash, and quick fasten features of all ROYAX splints and immobilizers.

Model	Item Code	Product Size	N.W/G.W	Loading Capacity	Outside Carton	Material
CR-R01	DJRT0001	2100×750mm	1.4KG/2KG	160Kg	600×440×300mm	Canvas

CR-V1	PZQD0002	2100×750mm	6.6KG/7KG	160Kg	600×440×300mm	TPV+Polyester

CR-L1

Ideal for moving a casualty safely in almost any rescue situation. Providing full body protection, baskets stretcher can be dragged, carried or lifted across rough or muddy terrain – horizontally or vertically – without affecting the patient's well being.

CR-L2

This is made from a high-density polyethylene shell supported by a permanently attached, heavy-duty, aluminum frame. The shell is chemical, UV, rust, and corrosion resistant and a replaceable closed-cell foam pad is attached inside the stretcher for patient comfort.
Four two-piece 5' quick-release patient restraints are simple to use. Two-Piece Back-packable Basket Stretcher separates in half for compact storage or backpacking to a rescue site.

CR-L3A

The stretcher is made with an eye on a very wide range of special emergency situations, such as in the mountains, air and at sea, ideal for lifted and transported by helicopter.
With safety belts and a mattress, it will not potentially cause additional harm to the patient. It is stronger than common stretcher, It can be used together with a PE stretcher; CR-L3A can be separated into two parts, easy to carrying.

Model	Item Code	Product Size	Folding Size	N.W/G.W	Loading Capacity	Outside Carton	Material

Extrication Device

INTRODUCTION

For the patient's head and vertebral column vertical and horizontal immobilization.

- Allow X-ray/MRI examination.
- Can be used together with cervical collar and head immobilize.

Cervical Collar

INTRODUCTION

- provide a low cost solution to neck immobilization.
- Space saving storage due to flat design | Chin piece flips up automatically.
- Spacious access to tracheal area for airway management and palpation
- Fixation option for endotracheal tube holders as well as O2-tubing, etc.

Head Immobilizer

INTRODUCTION

Head immobilizer can be separated and fixed on the stretcher directly, it can save time during the rescue, and also have space for stocking.

Traction Splint

INTRODUCTION

Traction splints are most typically used to treat severe Mid shaft fractures of the femur but also fractures of other limbs.

When the femur breaks, the surrounding muscles can spasm and may result in pulling the bone ends past each other, which results in immense pain, bleeding (internal or external), and muscle and nerve damage.

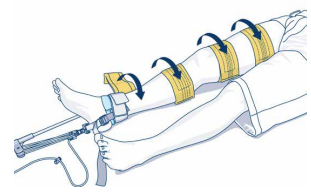

Traction Splint

INTRODUCTION

Traction Splints provide mechanical traction to relieve pain and reduce the possibility of further vascular and nerve damage on patients with suspected long bone fractures of the lower extremities.

Wide elastic support straps maintain the injured leg within the frame of the splint, helping to provide in-line mechanical traction. Simple, step-by-step instructions are sewn directly on the straps.

EMS Advanced Backpack

Item Code: HWDB0034

INTRODUCTION

EMS ADVANCED TRAUMA BACKPACK is a crucial tool for emergency medical services, carefully crafted to efficiently organize and access critical medical supplies. With multiple compartments and flexible storage options, it facilitates a systematic arrangement of tools and medications. Its ability to quickly accommodate or remove oxygen cylinders allows for adaptability to diverse emergency needs. The ergonomic design prioritizes wearer comfort through even weight distribution. Engineered for durability, it can withstand rigorous field use, ensuring secure storage of essential supplies. Overall, it is an indispensable asset, guaranteeing preparedness and reliability for effective emergency responses.

Item Code: PZBD0152

PBT Conforming Bandage

INTRODUCTION

PBT bandages is the ideal bandage for dressing wounds or wrapping around wounds to provide light compression.

Gauze bandages are usually 100% cotton but this makes it inelastic and unable to fully conform to the curves of the body, provide elasticity by way of viscose, a semi synthetic material made from cellulose.These bandages can also extend to 150% of their original length.

Item Code: PZBD0016

Elastic Crepe Bandage

INTRODUCTION

Elastic bandages (also known as compression bandages) are often used for the compression part of RICE—rest, ice, compression and Elevation.

They do a good job of compressing a new injury and help keep swelling down. However, there's a limit to how long you should compress an injury. At some point, blood flow to the injured area needs to increase to encourage healing.

Item Code: PZBD0013

Elastic Cohesive Bandage

INTRODUCTION

This elastic crepe bandage is made of cotton mixed with rayon and designed for assistant treatment of sprain fracture, soft tissue injury, arthrosis gall and vena varix, etc. After sterling, this cotton crepe bandage could be used on wound parts enswathement after operation directly.

Item Code: DIBD0012

First Aid Bandage

INTRODUCTION

First aid bandage is a very traditional form of cotton gauze bandage for use in first aid. White open weave bandage does not stretch, so it is useful in situations where you need to avoid constricting a wound.

Name	Item Code	Product Size	N.W/G.W	Outside Carton	Material
PBT bandage	PZBD0152	Length(stretched):4m,4.5m,5m; Width:5cm,7.5cm,10cm,15cm	11g/12kg	480×380×370mm	55% viscose; 45% cotton with woven edges

Item Code: PZST0011

Nitrile Gloves

INTRODUCTION

Latex-free 100% Nitrile formulation offers better puncture and abrasion resistance than natural-rubber or vinyl. Soft elastic material with 4milth-ickness provides tactile sensitivity and dexterity.-Excellent grip in both wet and dry conditions.

Item Code: LTST0015

Latex Gloves

INTRODUCTION

Commercial Disposable Vinyl Gloves are a great all-purpose glove, made with 100% latex-free vinyl material and a form-fitting size for high levels of dexterity. Safe for food handling and cleaning, these gloves help protect hands from messy jobs.

Item Code: PZST0015

PVC Gloves

INTRODUCTION

They are soft, comfortable to wear, and latex-free, are made to provide you with an additional layer of protection, and made of premium food grade PVC, which means they are completely safe for use.

Item Code: SBXY0003

Manual Resuscitator

INTRODUCTION

Latex free PVC Disposable Resucitators.
Compression unitin handy design and structured surface for safe grip.
Rotatable patient connector with an integrated safety valve for respiratory pressure relief.

Item Code: PZMZ0017

CPR Mask

INTRODUCTION

This CPR mask rescue kit comes with a reusable, easy-to-clean, pocket size CPR mouth barrier with a transparent dome that securely fits the faces of infants, children, and adults. This CPR mask kit helps protect rescuers in an emergency situation. Features a replaceable one-way valve with biological filter in one housing.

Item Code: PZMZ0001

Mouth to Mouth Mask

INTRODUCTION

Breathing membrane into the middle of the mouth of the wounded mouth, from another blow for the wounded.
The check valve will prevent the plastic nozzle with a breath into the mouth of the wounded and rescue personnel, best for artificial respiration.

Item Code: PZJJ0024/PZJJ0007

Emergency Blanket

INTRODUCTION

These lightweight, compact and extremely versatile emergency blankets are an outdoor essential. Use as an emergency shelter, sun shade, ground cloth, rain poncho, signal device and much more.

Item Code: PZSD0001

Emergency Sleeping Bag

INTRODUCTION

For minimalists and emergencies: extremely lightweight bivy sack made from waterproof PE-foil - packs down small. Mummy shape, no zipper and silver reflective material for improved thermal efficiency.

Item Code: PZZP0001

Emergency Tent

INTRODUCTION

This is a great item to have in any emergency kit or just keep one in your car, camping, backpacking, hiking, Auto, outdoor, ice fishing and for any type of emergency that may arise. Use it to get out of rain to cover up something from harsh weather and use it in emergency as a tent. light weight and easy to setup.

Splint Kit

INTRODUCTION

It is built from a thin core of aluminium alloy, sandwiched between two layers of closed cell foam. Bent into various shapes and curves, it becomes supportive for any fractured or injured limb.Available in a range of sizes, SVS Almost any bone in the body can be splinted with it.

Item Code: PZJB0019

Silicone Foam Dressing

INTRODUCTION

Designed with utmost consideration for patients who may be paralyzed, injured, ill, or of advanced age, these cutting-edge wound dressings not only shield the wound but also expedite the healing process. With an exceptional absorption capacity, the Waterproof Non-Adhesive Foam Wound Dressings possess a semi-permeable nature that prevents adherence to the wound bed. This remarkably absorbent and pliable dressing fosters a moist environment conducive to healing, all the while safeguarding the wound against external bacterial contamination.

Item Code: PZFL0041 / PZFL0042 / PZFL0043 / PZFL0044

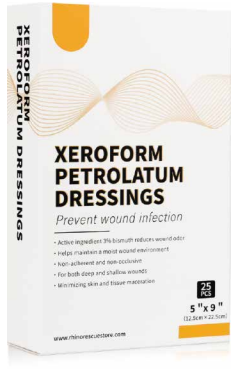

Item Code: PZFL0040

Hydrocolloid Dressing

INTRODUCTION

Extra Thin Square Hydrocolloid Dressing is intended for superficial wounds, dry to lightly exudating dermal ulcers, and as a protective primary dressing. The hydrocolloid dressing provides a waterproof barrier over the wound which helps protect it from bacteria and viral contaminates. It is comfortable and flexible making it easy to mold and fit, even in difficult areas. The dressing gels when it comes into contact with light exudate to avoid leakage around the bandage.

Item Code: PZSB0053

Xeroform Petrolatum Dressing

INTRODUCTION

【Wound Dressing】 The Xeroform dressing patch, composed of petrolatum and 3% Bismuth Tribromophenate, fosters a moist healing environment and aids in skin tissue repair.

【Widely Used】 Using for lightly exuding or partial open wounds, including lacerations, burns, abrasions, donor sites, skin graft sites and surgical incisions.

Material: Non-woven,
75% medical alcohol

Alcohol Pad

INTRODUCTION

Is made of spunlace non woven cloth and saturated with 70% isopropyl alcohol. It is used for cleaning wounds and protect wounds from germs. Also can be used for cleaning phone's screen,High precision part. It's gentle and comfortable, can be used in hospitals or for personal.

Material: Non-woven+10%
povidone-lodine solution

Povidone-Iodine Prep Pad

INTRODUCTION

Iodine Prep Pads are non irritating germicidal antiseptic prep wipes used to swab the skin and kill bacteria prior to medical procedures. Iodine Prep Pads are a first aid antiseptic used to help prevent skin infection in minor cuts, scrapes, and burns.

Material: Wet strength paper

Soap Wipe

INTRODUCTION

Soap wipes are individual towelettes for easy hand cleaning when soap and water are not available.They are formulated with a non-flammable, non-irritating, skin cleansing and moisturizing solution that will leave your skin feeling soft.

Material: 100% cotton

Benzalkonium Chloride

INTRODUCTION

These antiseptic towelettes, with the active ingredient Benzalkonium Chloride, are ideal for cleansing wounds when alcohol is inadvisable. Their single-use design eliminates the worry of cross contamination.

Infrared Thermometer

INTRODUCTION

- Body mode and object mode are available.
- Stronger environment temperature adaptability.
- Accurate and reliable, even under complicated surrounding.
- Temperature alarm prompt, like the fever can be set emergency alarm.
- Large LCD back-lit display for convenient and shut off automatically.
- Automatically save the last measured values.

Item No.	PZEW0001
Measuring range	32-43°C/85.9-109.2°F
Resolution	0.1°C/0.1°F
Measuring accuracy	±0.2°C/±0.4°F
Opt. Measuring distanc	5-15cm
Memory	32 values
Operating Temperature	16°C-35°C
Weight	169 g
Dimension	86mmx160mmx46mm
Power supply	2xAA 1.5V Batterie (nicht enthalten)

Digital Thermometer

INTRODUCTION

Digital thermometer is one of the finest digital clinical thermometer in the world.It is a High quality, Digital thermometer is one of the finest digital clinical thermometer in the world.It is a High quality, service.This digital thermometer can be used as household item or in hospitals.

Item No.	PZWD0001
Certification	32-43°C/85.9-109.2°F
Response Time	Around 30 seconds
Range	32.0°C - 42.9°C
Accuracy	±0.1°C,35.5°C - 42.0°C / ±0.2°C below 35.5°C or over 42.0°C
Display	Liquid crystal display, 3 1/2 digits
Battery	One 1.5 V button battery included
Dimension	12.5cm x 1.8cm x 1.1cm (L x W x H)
Other	Last Reading Memory,Fever Alarm,Auto-Shutoff

Fingertip Oximeter

INTRODUCTION

The fingertip pulse oximetre features in small volume, low power consumption, convientient operation and being portable. It is only neces-sary for patient to put one of his fingers into a fingertip photoelectric sensor for diagnosis and a display screen will directly show measured value of hemoglobin saturation.

Item No.	SBXC0001
Certification	ISO 9001,ISO 13485,CE0197,Rohs,FDA
Response Time	Around 30 seconds
Range	32.0°C - 42.9°C
Accuracy	±0.1°C,35.5°C - 42.0°C / ±0.2°C below 35.5°C or over 42.0°C
Battery	One 1.5 V button battery included
Dimension	12.5 x 1.8 x 1.1 cm
Other	Last Reading Memory,Fever Alarm,Auto-Shutoff

Hand Operated Suction Unit

INTRODUCTION

The hand suction unit is mainly used in different levels of hospital to absorb the phlegm, purulenve, blood. With the advantage of small size. light weight , easy to carry and use, also no electricity powder needed.

Item No.	/	Operating Temperature	-20°C to +50°C
Vacuum	0 to -73 kPa (0 to -550 mmHg)	Storage Temperature	-40°C to +60°C
Flow Rate	Maximum at least 20 litre/min	Unit Dimensions	198 x 169 x 74mm
Disposable container volume	300ml	External diameter of catheter connection	13mm and 6mm
External diameter of cap	17mm	Unit Weight	247g

Oxygen Regulators

INTRODUCTION

Oxygen regulators are attached to oxygen cylinders that allow refilling of the tanks with an oxygen tank refilling machine or from a durable medical equipment company. They are meant to simplify tank refilling machine or from a durable medical equipment company. They are meant to simplify oxygen therapy.

FEATURES

- Body material: aluminum 6061 T6 anodized / ALL BRASS chrome-plated.
- All brass internal.
- Flow range: 0-4, 0-8,0-15, 0-25lpm.
- Barb/ DISS outlet.
- Max 3,000psi inlet pressure.
- Outlet pressure : 50psi.
- Comply with ISO10524-1, ASTM G175-03 CGA E-4 standards.

Aluminum Tank

Steel Tank

INTRODUCTION

Our portable medical oxygen respirators are produced through advanced technology, available in aluminum and steel ones. High quality, easy to carry, preferable for people with breathing problems. Full specifications meet different customer's demands.Working pressure: 139bar-200bar. Valves, fittings and threads according to customer's requirements.

Criteria	Working Pressure	Capacity	Length	Weight
ISO 7866	139 bar	1.2-29.5 Lts	202-1216 mm	1.4-22.0 kgs
	150 bar	0.8-50.0 Lts	248-1403 mm	0.8-43.8 kgs
	200 bar	1.0-50.0 Lts	227-1500 mm	1.4-56.0 kgs

Criteria	Working Pressure	Capacity	Length	Weight
ISO9809-3	150 bar	6.0 Lts	590 mm	5.9 kgs
		15.0 Lts	831 mm	15.2 kgs
		40.0 Lts	1340 mm	36.5 kgs
