You have just received a new product catalogue of **KLARO, s r. o.** company for the healthcare sector.

The entirely Czech company KLARO, s r. o., founded in 1990, manufactures handling equipment. Our product range is being continuously expanded, and our products are becoming more and more sophisticated. During the last years, we managed to assemble a well coordinated team of professionals from different fields and to build our own, technically advanced facility at Velké Chvalovice, where we have concentrated all our production.

We can be proud of our most comprehensive offer of handling equipment on the Czech market. Our offer is tailored for sophisticated healthcare facilities, social services, accommodation and other facilities. Our products simplify the work and help increase the quality for our customers at many places in the Czech Republic and abroad.

Our customers can choose from a huge number of types of carts and accessories of a different design, sizes and a wide range of colours.

We monitor new trends, flexibly respond to more and more demanding requirements on quality, and we are continuously developing and proposing new improvements and new types of carts. We don't leave any idea unnoticed. We collect new findings and experiences from different types of facilities, and we use them to improve and design our products. Our development never ends.

Let's become our inspiration...

Here we have tried to create an easy to understand outline of our most used products so that you can navigate through the new catalogue easily. Please, make your own judgement whether our effort was successful.

The following pages offer a small sample. Please read and choose...

ČSN EN ISO 9001:2009

ČSN EN ISO 14001:2005

Our products are designed to:

- minimize your effort
- make your work more effective
- save your energy
- shorten the time of handling materials
- make the arrangement and storage of material, tools, documentation, etc. more organized
- allow better control, durability against the wear and easy maintenance
- have a good look and keep their high functionality
- have every detail made of the most quality materials
- have universal complements, parts and accessories usable for different types of carts

SPECIFICATION OF PRODUCT LINES AND MATERIALS

The largest area we target is the healthcare. We deliver multi-purpose carts, cabinets, etc. Such products are sorted into three categories: **ECO, BASIC AND PROFI.**

To make your decision among these variants easier, **there are several important differences.**

BASIC line

- most favourite variant, including an unlimited selection of complements
- equipped with MODULE SYSTEM
- suitable for all facilities
- dust-tight drawers

PROFI line

- best quality, made of top materials
- cart construction - stainless steel AISI304
- equipped with MODULE SYSTEM
- suitable for all operations, including the most demanding
- dust-tight drawers

ECO line

- affordability while maintaining the quality and functionality of carts
- cart construction including drawers - steel
- limited choice of complements
- suitable for all operations

Specification of used stainless steel in our production:

We offer stainless steel parts and products in two versions.

Stainless steel AISI304 - STANDARD MATERIAL

- standardly used material for our products
- use in regular food or medical facilites
- resistant to common cleaning agents

Stainless steel AISI316L - SPECIAL MATERIAL

- extraordinary use of the material upon customer's request
- use for storage or handling of chemicals
- resistant to conventional cleaning agents as well as chloride acids and compounds.

MULTIFUNCTIONAL CABINETS - MODULE SYSTEM

For our products, we use all the benefits of the module system. All types of module baskets can be hung in our open, closed, drawer or shutter carts. The inner sides of carts are equipped with hinges so that it is possible to hang on them differently deep baskets and to combine them according to topical need. The baskets can also be supplemented with dividers and a plastic case for labels - easily placed in different positions.

Simplicity, organized, variable and intelligent system of supplies managements. Functionality and technology in the perfect harmony.

At customer's request, we can assemble entire room furnishings. In addition to mobile products, we also offer fixed products, such as different types of racks, cabinets, stainless steel desks, countertops, sinks, shelves and other accessories. In the areas, where material transferred in MS baskets is collected, we supply lockable dust-tight cabinets in three different heights with full or glassed doors. In addition to enclosed cabinets, the material in MS baskets can also be stored in open shelves of various sizes. Both types, open and closed, are equipped with rails for hanging differently deep MS baskets. The full fronts of cabinets, small cabinets, shelves, etc. are supplied in different colours. Therefore, the whole room can be colour matched according to your wishes.

MODULE SYSTEM offers optimum storage solutions.

The multifunctional carts of the module system line are an efficient solution to logistical problems with the material. The customer chooses his own equipment, a combination of drawer units and individual cart accessories such as baskets, drawers, tubs, dividers, etc.

PLASTIC BASKETS - MS SYSTEM

You will discover their simplicity and organization based on space utilization and efficient control of supplies. They are made of high-quality and durable ABS plastic. They are easy to maintain, hygienic, highly durable, withstand high temperatures and standard cleaning agents. Universal, shallow, medium and deep baskets can be placed in any way to all carts of the MODULE SYSTEM line.

Don't you know how to select? We will be happy to advise you! Toll free: +420 800 100 798

DIVIDERS (PARTITIONS)

Dividers have the shape of a „comb", so they can be assembled freely into each other, thereby creating different sizes of the compartment - all the space is thus utilized. Changing the size of the compartments along the length and width and attaching them to the selected position can be don within a few seconds.

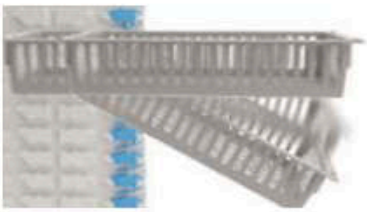

FLEXIBILE SYSTEM for easy handling the MS baskets

HORIZONTAL POSITION OF BASKETS

Possibility to pull out module baskets in the horizontal position in low and medium cabinet versions.

POSITION WITH THE BASKET ANGLE OF 25°

Possibility to pull out module baskets at the 25° angle in the high cabinet version at the upper third part (first 12 positions).

THREE SIZE TYPES OF MS BASKETS

Universal shallow, medium and deep baskets can be placed in any way to all carts/cabinets of MODULE SYSTEM.

LABELS

MS baskets may have labels attached.

Don't you know how to select? We will be happy to advise you! Toll free: +420 800 100 798

HEALTHCARE CABINETS - METAL LINE BASIC

- steel construction with powder coating, body colour RAL7042 - grey
- options of door colours according to samples
- the interior of the cabinet is fitted with plastic walls allowing the MS baskets to be suspended in three sizes (S, M, L)
- at the upper one third of the cabinet (first 12 positions) of the high version are side walls allowing tilting the MS basket out at the 25° angle to provide clear look inside; other side walls allow horizontal pulling the MS basket out
- cabinets are provided in two designs - with transparent or in a more affordable design - with full doors
- doors: lockable and dust-tight with the option of the left or right opening
- baskets are to be ordered separately

METAL LINE BASIC

We produce all the carts in two basic height variants and in different widths and lengths so that they can be incorporated into the existing equipment of medical rooms, patient wards and other operations and adapted to the fixed room equipment in colour and dimensions.

It is upon you which types you choose and assemble.
We will satisfy your requirements and preferences.

For transportation and handling of various medical materials, drugs, documentation, instruments, etc., you can use open or closed types of carts, cabinet carts, drawer carts or shutter lockable carts. Carts can be equipped with a large number of complements per the actual need.

Don't you know how to select? We will be happy to advise you! Toll free: +420 800 100 798

METAL LINE BASIC - STANDARD

DRAWER CARTS

For options of supply of complements, see p. 82-85.

With these complements you may assemble multipurpose cart, such as medicinal, doctor vidit, bandage, anaestesilogy and resuscitation carts, see p. 59-60.

Desktop made standardly of stainless steel AISI304

with frame 12 mm and four rounded protective plastic elements (ABS) in desktop corners. Load of desktop: max. 20 kg.

Drawers central locking.

Drawers are equipped with removable plastic MS basket.

Plastic basket can be divided using partitions - for options of division see p. 88.

Handle made of stainless steel AISI304.

Drawer handles, including the push one, are inserted to plastic clips.

Cart construction made of steel with powder coating

grey RAL7042.

Drawers equipped with full telescopic ball sliding buffer and damper

Drawer covered by compact face made of cured plastic (ABS)

with rounded corners and edges.

For options of colour design of drawer fronts see p. 86.

Dust-tightness of drawers.

Drawer fronts equipped with rubber profile along all the circumference.

Four corner bumpers made of resistant (PE) plastic.

4x quality plastic caster Ø 12,5 cm, 2x brake.

MULTIFUNCTIONAL CARTS - MODULE SYSTEM

We can also assemble complete equipment for entire rooms. In addition to mobile products, we also offer fixed products, such as different types of racks, cabinets, stainless steel desks, countertops, sinks, shelves and other accessories.

For the areas, where material transferred in MS baskets is collected, we supply lockable dust-tight cabinets in three different heights with full or glassed doors.

In addition to enclosed cabinets, the material in MS baskets can also be stored in open shelves of various sizes. Both types, open and closed, are equipped with rails for hanging differently deep MS baskets. Doors of cabinets, small cabinets etc. are supplied in different colours.

Therefore, the whole room can be colour matched according to your wishes.

We will be glad to specifically tailer the graphic design according to your requirements.

MULTIFUNCTIONAL CARTS - MODULE SYSTEM

Our customers can choose from a copious number of types of carts and complements of a different design, sizes and a wide range of colours.

We monitor new trends, flexibly respond to more and more demanding requirements on quality, and we are continuously developing and proposing new improvements and new types of carts.

We don't loeave any idea unnoticed. We collect new findings and exprecience from different types of facilities, and we use them to improve and design our products. Our development never ends.

MULTIFUNCTIONAL CARTS - MODULE SYSTEM

Carts can be equipped with drawers in a single or two rows next to each other or both types can be combined.

We offer drawers of four basic heights and different widths - with hinges for MS baskets or with fixed bottom or both variants can be used. In addition to MS baskets, drawers can be supplemented with partitions or dividers.

Drawers equipped with full telescopic ball sliding buffer and damper so they allow the MS basket to be easily pulled out, and they don't open during sliding.

Don't you know how to select? We will be happy to advise you! Toll free: +420 800 100 798

MULTIFUNCTIONAL CARTS - MODULE SYSTEM

FOR VARIOUS OPERATIONS

In addition to universal types of carts used in various operations, we offer also very specific carts developed for different departments.

Carts can be equipped with the barrier or with plastic desktop with the barrier.

Using various complements you can create carts, such as medicinal, bandage, doctor visit, resuscitation, surgical and other carts for specific activities.

INSTRUMENTATION CARTS - MAYO INSTRUMAN HYDRAULIC TOP I

NEREZ1113* - width 80 x depth 56 x height 90 - 130 cm

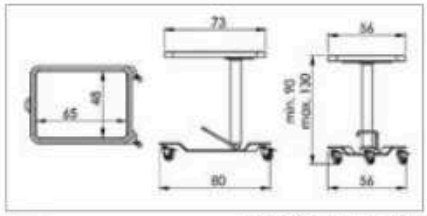

Sterilization: max. 130°C by steam for 3 minutes.

Desktop with frame 1,2 cm and turnable by 360°with the arrestment. Removable and portable. Even load: max. 50 kg.

Hydraulic elevation - hydraulics with specially developed telescope. Hydraulic telescope is protected against leaking of the hydraulic liquid and being overturned.

Cart construction made of stainless steel AISI304 including the desktop.

Minimum height 90 cm - maximum height 130 cm.
Elevation by 40 cm.

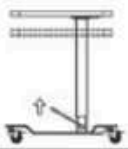

All-stainless steel Y-shaped design of the undercart made of stainless steel AISI304.

Cart antistatic design.

3x stainless steel caster Ø 7,5 cm with brake.

TOP Hydraulic cart is appreciated by healthcare workers mainly due to its comfortable operation and the elegant design. During work, you can use a specially developed telescope allowing not only desktop sensitive elevation, but also an above average change of its height up to 40 cm. A larger desktop with a deeper working area ensures a safe deposit of objects.

TOP Hydraulic cart is an outstanding product and you will surely appreciate the comfort it provides for a healthcare facility and that your specialized work deserves.

	Working desktop can be easily removed at any time.		Stop lever of the turnable working desktop arrest.		Depth of the stainless desktop is 12 mm.
	**Elevation:** Stepping on the foot pedal elevates the desktop up to the max. height of 130 cm from the floor.		**Lowering:** Elevating the foot pedal continuously lowers the desktop down to the minimum height of 90 cm from the floor.		Foot pedal allowing a continuous and sensitive elevation of the working desktop by 40 cm.

INSTRUMENTATION CARTS - MAYO INSTRUMAN HYDRAULIC TOP II

NEREZ1114* - width 73 x depth 56 x height 90 - 130 cm

Sterilization: max. 130°C by steam for 3 minutes.

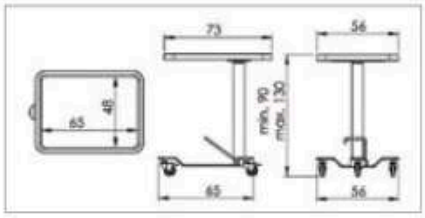

Desktop with frame 1,2 cm and turnable by 90° with arrestment to both directions. Removable and portable. Even load: max. 50 kg.

Hydraulic elevation - hydraulics with specially developed telescope. Hydraulic telescope is protected against leaking of the hydraulic liquid and being overturned.

Cart construction, including the desktop, made of stainless steel AISI304.

Minimum height 90 cm - maximum height 130 cm.
Elevation by 40 cm.

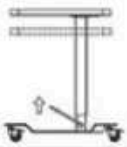

All-stainless steel T-shaped desing of the undercart made of stainless steel AISI304.

Cart antistatic design.

3x stainless steel caster Ø 7,5 cm with brake.

TOP Hydraulic cart is appreciated by healthcare workers mainly due to its comfortable operation and the elegant design. During work, you can use a specially developed telescope allowing not only desktop sensitive elevation, but also an above average change of its height up to 40 cm. INSTRUMENTATION CARTS - MAYO INSTRUMAN HYDRAULIC CLASSIC

NEREZ1120* - width 66 x depth 48 x height 90 - 130 cm

Classic Hydraulic cart is appreciated by healthcare workers because of its high functionality and easy operation during work. This is allowed e.g. by hydraulic elevation and a turnable and removable desktop.

Classic Hydraulic cart will make your demanding work at your facility easier.

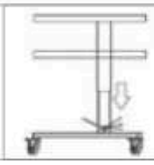

Working board can be easily removed and washed thoroughfully at any time.

Stop lever of the turnable working desktop arrestment.

Elevation:
Stepping on the foot pedal elevates the desktop up to the max. height of 130 cm from the floor.

Lowering:
Elevating the foot pedal continuously lowers the desktop down to the minimum height of 90 cm from the floor.

Foot pedal allowing a continuous and sensitive elevation of the working desktop by 40 cm.

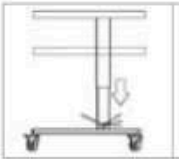

INSTRUMENTATION CARTS - MAYO INSTRUMAN MAXI

NEREZ1125* - width 109 x depth 67 x height 90 - 130 cm

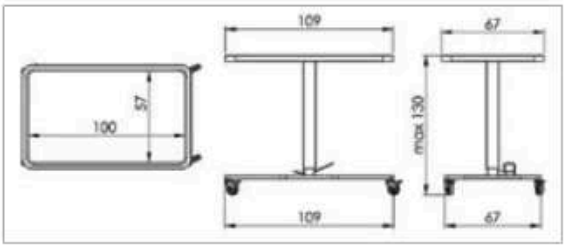

MAXI Hydraulic cart provides comfort to your work at the healthcare facility that your specialized work deserves.

Because of its large desktop with an elevated edge and an increased load, MAXI Hydraulic cart allows you to place aside a larger amount of healthcare material and tools, which increases flexibility during your work. Easy operation during work is provided by the hydraulic elevation.

Lowering:
Elevationg the foot pedal continuously lowers the desktop down to the minimum height of 90 cm from the floor.

Elevation:
Stepping on the foot pedal elevates the desktop up to the max. height of 130 cm from the floor.

Depth of frame is 1,2 cm.

Foot pedal allowing a continuous and sensitive elevation of the working desktop by 40 cm.

Don't you know how to select? We will be happy to advise you! Toll free: +420 800 100 798

INSTRUMENTATION CARTS - MAYO INSTRUMAN PNEUMATIC SPRING

NEREZ1130* - width 66 x depth 48 x height 90 - 130 cm

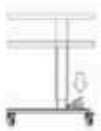

When working with the Pneumatic Spring cart, you will appreciate the easy operation at the changed height because of the gas spring. Turnable and removable desktop allows flexibility during your work. Pneumatic Spring cart meets demanding requirements of healthcare work.

Working desktop can be easily removed and washed thoroughfully at any time.

Stop lever of the turnable working top arrestment.

Elevation: Using the gas spring allows cont. elev. of the working top upward when stepping on the foot pedal (up to the 130 cm from the floor). When releasing the pedal, the working top stops at the desired height.

Lowering:
Elevating the foot pedal continuously lowers the top down to the minimum height 90 cm from the floor.

Foot pedal allowing a continuous and sensitive elevation of the working top by 40 cm.
