CATALOGUE 2023

Navailles®

Located in Hagetmau, capital of the chair, the Navailles factory specializing in the production of seats has just obtained the Guaranteed French Origin Label for its medical chairs. Indeed, it was at the start of 2022 that the Pro France association issued them the certification. This association aims to promote the French origin of products and more specifically the “France brand”.

ORIGINE FRANCE® GARANTIE

Crafted for work

The story of our seats starts in the heart of the Landes region...

An expert in designing technical equipment for top racing cyclists, Robert Navailles was joined by his two sons in 1966. Each contributing their own particular expertise, they were to shape the history of Navailles. From the very start, they wanted to listen to society and its needs, developing a company that was both innovative and people-friendly. It was then they started designing and producing made-to-measure furniture.

Since then, there have been many changes in the world of work: women’s liberation through access to work, the first computers, more time spent seated at work, progress in the medical field, the rise of remote working, and more. A constant state of evolution, which also saw a growth in musculoskeletal disorders, blood circulation problems and other negative effects caused by a prolonged poor sitting posture.

With its integrated research department, Navailles has all the skills and expertise needed to adapt constantly, and to meet these new needs. Its constant quest: to design ergonomic seats suited to every space, and improve wellbeing in the workplace.

A business and products that move with the times.

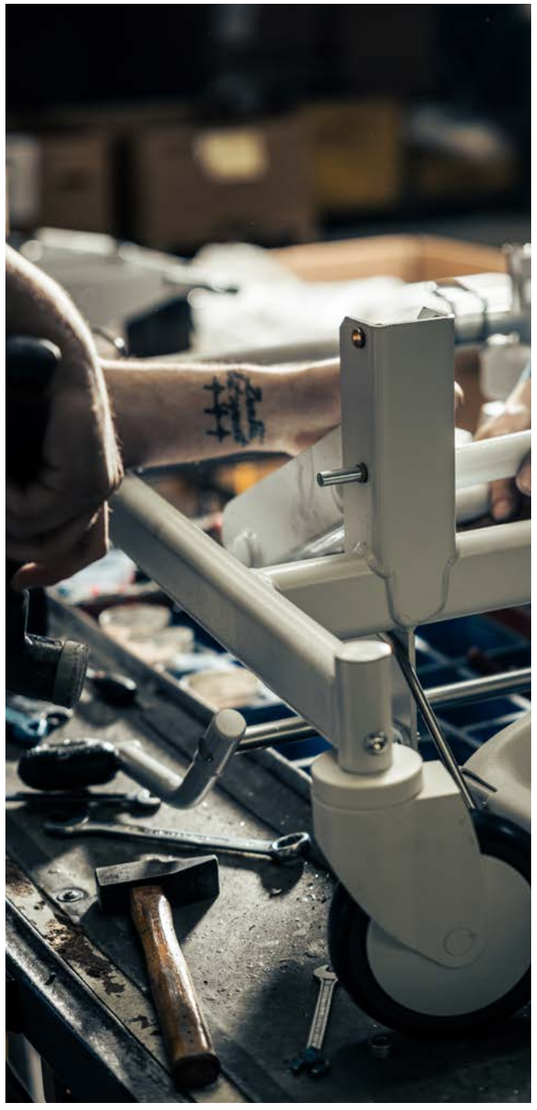

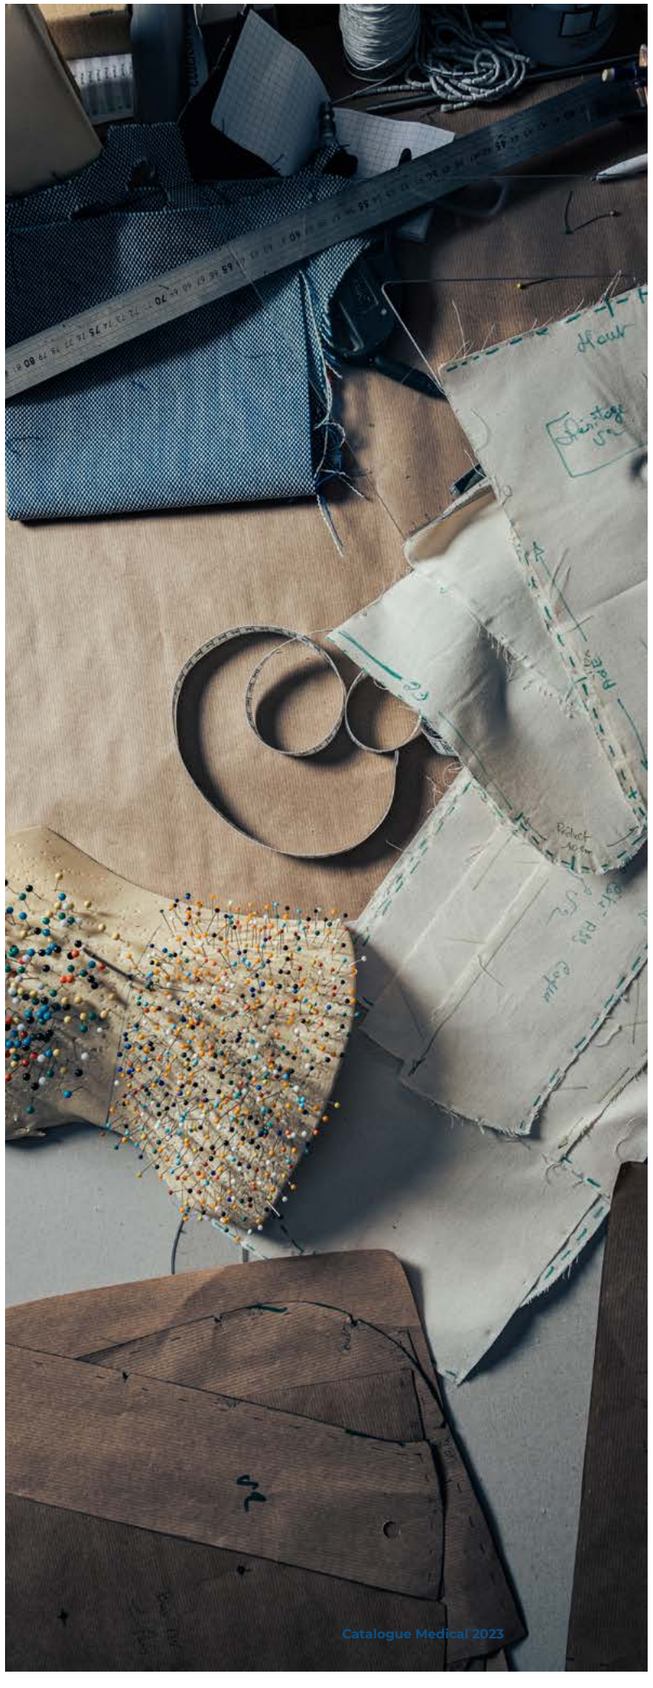

Craftmens serving wellness

Our workshops are characterised by a unique wealth of artisan and industrial expertise. Our armchairs are handmade in France, at our workshops in the heart of the Landes region. Our local production approach enables us to guarantee flawless quality. Our production machinery supports our 80 qualified staff, working day by day for your wellbeing. It helps our teams with high-precision and repetitive tasks, closely monitored by the staff, and working to the highest possible standards of excellence.

Our own in-house research department enables us to anticipate your needs. It is at the heart of the creative and continuous improvement process. Our engineers, draughtsmen, designers and prototype makers listen carefully to feedback from customers to offer ergonomic products with ever higher standards, suited to society's actual needs.

Our expertises

Manufacturing in our own workshops in France enables us to control all our creative and production processes. The quality of our chairs and armchairs is controlled at each step of the process.

Sheet metal work

This is the basis and historical DNA of our expertise. In our workshops in the Landes, we shape, cut and bend the tubes that will serve as the structure of our chairs. We assemble the frames of our seats in these workshops by hand or with our welding robots, to guarantee they are strong enough to stand up to any test.

Stitching and filling

Our backrests and seats are handmade by a team of qualified craftsmen. Their expert stitching and filling guarantees optimal comfort, moulding to and supporting your back, for years to come. These techniques can be adjusted ad infinitum, to make the ideal chair that perfectly suits your needs.

Design

To keep our seats in tune with their times, the design of each product is studied in the minutest of detail. Each seat is created to meet every design expectation. Whether it's an ergonomic design for optimal comfort, a robust structure to withstand the toughest test, or an on-trend design to match the expectations and changing standards of interior design, nothing is left to chance.

TREATMENT CHAIRS

ROOM CHAIRS

ADDITIONNAL INFORMATIONS

Navailles and sustainability

Even before the current environmental issues emerged, Navailles wanted to favour short distribution channels and local partnerships. Today, our thinking has matured and gone even further, towards eco-designed products, a recycling-focussed mindset.

It doesn't stop there. In our desire to champion French know- how, we've guided our management towards participative methods with people at their heart. From the outset, we wanted to maintain local production to promote employment, but also protect the planet from unnecessary consumption of resources.

Naturally, this is an approach we've applied consistently across all our areas of activity, and which we're constantly developing.

The process revolves around different action areas:

Système de management
ISO 9001:2015
ISO 14001:2015
ISO 50001:2018
www.tuv.com
ID 0910087092

Navailles is ISO 14001 certified.
In this context, an analysis environmental was carried out assessing the impact of our activity on the following topics.

Environmental approach

From the initial design of all our chairs, armchairs and stools, and throughout the manufacturing process, we're careful to limit the environment impact of our business. We use the least polluting and the most easily recyclable materials. A waste sorting procedure has been implemented to ensure each component is recycled or processed correctly. We limit waste production as much as possible (through minimal use of adhesives, solvents, oils etc.), and our production process requires no water.

Eco-design

When we develop a product, we look at its entire lifecycle. From the raw material, through production, use, distribution and finally recycling, every stage is studied in microscopic detail. To do that, we've invested in a lifecycle assessment tool, providing details about a product's carbon footprint, even before development starts.

The quality of our seats, along with their often minimalistic and timeless design, gives them the capacity to last and last. In addition, and to combat planned obsolescence, replacement parts are available on request. The aim is not to have to buy the same product again, and to avoid new waste being created.

For such an eco-design approach to be totally consistent, it cannot exist without proper performance indicators being put in place. Those indicators allow us to assess the impact of our actions and to identify new areas for our continuous improvement work.

Corporate

We know nothing can be done without the men and women who design, manufacture and sell our ergonomic professionalseatsolutions.That'swhywe believe in a participative management style that harnesses the skills and ideas of each individual. Initiatives, ideas and involvement from our colleagues are hugely encouraged. Various QWL (Quality of Working Life) actions have also been put in place: dialogue, team building events, gender equality, right of expression, participative management etc.

Supply chain

We prefer to work with the local ecosystem by using suppliers who are local to us and share our social and environmental values. Throughout each partnership, we check the capacity of our suppliers to meet all our criteria, and we push them to improve their environmental performance.

Responsible transport

So that our environmental commitments are reflected throughout the logistical chain, we try to keep our carbon emissions as low as possible. To achieve that, we share lorries with other companies, to guarantee optimal loading, and we're investing in a fleet of electric vehicles.

Seat recyclability

ECO-TAX

This eco-tax is:

- displayed individually in addition to the sales price at the point of sale and on invoices
- passed on to the end customer,
- subject to VAT.

It may not be subject to any rebate or trade discount.

PRODUCT CATEGORIES

The different furnishing items are classified by family:

All seats are in category 09: Seats – **Family: Seating**

Worktops such as desks, tables and various worktops are included in the **Family: installation and worktops**

The storage units made up of cupboards, lockers and other side tables are part of the **Family: storage**

COST

For the 3 families mentioned (seat, table top and storage) the eco-tax calculation method is unique:

QUANTITIES

VALDÉLIA recovers the products to be recycled on simple request of a member within one month whatever the quantity of replacement products sold.

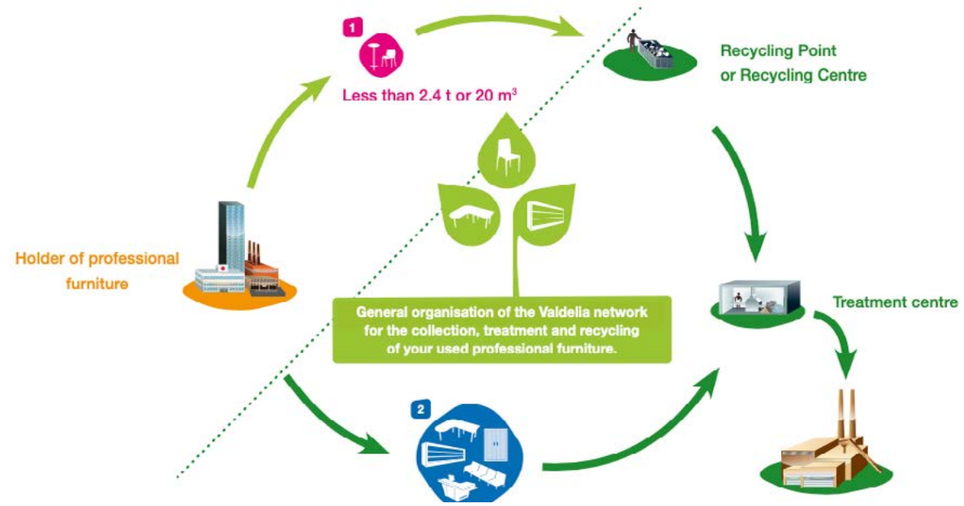

VALDÉLIA collects the products on the ground floor of the buildings under the following conditions:

- EFW quantity (Equipment and Furnishing Waste) > 20 m3
- and EFW quantity > 2.4 tons
- or using the example of VESTA: quantity higher than 73 VESTA products to recycle.

If the quantities are smaller, the holder (= the customer) must take the EFW to a recycling point at their own expense.

Registration number pursuant to Article L 541.10 of the Environmental Code : ***FR013501 10HTCZ***

Norms and certifications

Le Label OFG

Certifies the French origin and traceability of a product to consumers.
This certification ensures the promotion of “produce in France” and the enhancement of industrial and artisanal know-how.

FCBA 2203100

ISO 9001

ISO 9001 is the quality management standard. It provides guarantees in terms of organizational quality within any type of structure. ISO 9001 certification consists of providing proof that a continuous improvement system has been implemented within the company.

ISO 14001

ISO 14001 is the environmental management standard. It provides guarantees in terms of controlling environmental impacts in the company.

It concerns all the impacts of the company: waste, noise, greenhouse gases, energy, underground, etc.

ISO 50001

As companies today are increasingly involved in their energy consumption, ISO 50001 certification is becoming a global reference standard in the field of energy management.
ISO 50001 certification offers an adapted energy management system, allowing to optimize energy efficiency.

NF MOBILIER SANTÉ

The chairs are designed according to the functional and dimensional characteristics and safety tests recommended by the NF MOBILIER PROFESSIONNEL SANTÉ label defined by the FCBA.

• Certifications: The RHÉA and IRIS adjustable height seat chairs are NF SANTÉ certified

• Fire classification according to D2-2000: CF on all our references.

* PERMABLOK and SILVERGUARD coating (antimicrobial, anti-bacterial and anti-fungal characteristics).

Fire classification	FOR THE BUYER According to GPEM recommendation D1-2000	FOR THE MANUFACTURER According to GPEM recommendation D2-2000**
CF	Class adopted when the seat is subject to significant accidental ignition risks. (Example: premises with a large number of seats, premises with open flames or a large number of smokers, premises occupied by people with unpredictable behaviour or by people with reduced mobility).	The seat passes the tests for cigarettes (C) and gas burners simulating the flame of a match (F).
C	Reference class when the seat is subject to average accidental ignition risks (Example: room with a small number of seats, spaced seats, absence of open flames, flammable products, radiant or incandescent electric heaters, etc.)	The seat passes the cigarette tests (C) but not the gas burner test simulating the flame of a match (F).
EC	Class to avoid in the community	The seat does not pass the cigarette test (C) and therefore fails (E) the ignitability test

** La recommandation D2-2000 applique les normes :

NF EN 1021-1 Assessment of the ignitability of upholstered furniture in the form of test pieces. Ignition source: Burning cigarette.

NF EN 1021-2 Assessment of the ignitability of upholstered furniture in the form of test pieces.. Ignition source: Flame equivalent to a match. The cladding can be classed as CFz or CFb.

General terms and conditions of sale

1. ORDER ACCEPTANCE
Every order commits the buyer, who can only cancel it with our agreement. All orders are only binding on us through our written acceptance. Subsequent changes are only binding on us if they have been accepted by us.

2. PRICES AND TERMS OF PAYMENT
The prices are established according to our current price lists or our estimates, according to the characteristics and quantities requested. Our prices are based on the economic, fiscal and social conditions known at the time of publication and may be modified without notice. Our prices proposed by sending a price list or a quotation are valid for a period not exceeding one month from date to date. We do not guarantee the prices thus offered beyond this period, unless we agree in writing to a new or different period.
If supplies are staggered over several months, the prices set at the time of acceptance of the order will be indexed in line with the specific terms of the contract, or, failing that, on the variations in manufactured index published by INSEE under the heading of Consumer Prices, regarding production throughout France. Our prices are exclusive of turnover tax. Hence, they are subject to any applicable turnover taxes in force on the day of delivery.
Any order of an amount of less than 40 Euros excluding taxes shall be increased by a fixed sum of 10 Euros excluding taxes, as various administrative and individual processing fees.
Our invoices are payable at the registered office, in cash, without discount. The possible acceptance of instruments in payment can never give rise to a guarantee or liability on our part, either for irregular or protested instruments, despite the mention “free of charge”, or for failure to protest or disclose a protest
within the legal time limits, or failure to present bills of exchange in good time if they are less than 15 days old.
If the Buyer’s situation changes, we reserve the right to modify the terms of payment, and require any sureties or guarantees that we deem necessary to ensure payment for the goods sold.
Bills of exchange must be returned within the usual time limits: 15 days maximum. In the event of failure to comply with this time limit, we may demand the return of the goods, the immediate payment of all invoices still due, including those not yet due, and we may suspend the supply and execution of orders in progress, without prejudice to our rights to damages, if any. The possible continuation of deliveries shall not constitute approval and shall in no way limit our recourse against the defaulting Buyer. In all cases, late payments are subject to interest on arrears, calculated at three times the legal interest rate.
Any sum not paid on the due date shall incur a late payment penalty of 3 times the legal interest rate. As this penalty is agreed informally between the parties, it shall not require any prior notice. Non-payment on any due date shall automatically result in the payment of the entire outstanding balance and suspension of deliveries. In addition to this late payment penalty, a fixed indemnity for compensation of collection costs of €40 per invoice for which the due date is unpaid, not subject to VAT, shall be due automatically from the first day of late payment (Art. D.441-5 of the French Commercial Code - Decree of 02 October 2012).
Since 01/05/2013, and in accordance with decree no. 2012-22 of 06 January 2012, our profession is obliged to apply an amount corresponding to the Eco-tax, intended for the management of the Professional Equipment and Furnishing Waste (EFW). It is added to the amount of the invoice before tax and only applies to sales made to and from the French territory. The amount depends on the category and weight of the goods. The Eco-tax scale is likely to change without notice, and therefore, will be non-negotiable.

3. TECHNICAL SPECIFICATIONS
The characteristics, dimensions, weights, etc., mentioned in our various documents are provided for information only. We reserve the right to make any changes we deem appropriate to our materials.

4. TAXES
Our prices exclude taxes, with VAT of 20% applied in addition, ex-works (in accordance with the applicable regulations in force). Our activity is also subject to the CODIFAB tax at 0.18% on the price before taxes in the European Union (tax according to the regulation in force that may change).

5. DELIVERY
Deadlines are indicative, and we do not incur any penalty for possible delays. Cases of acts of God or force majeure hindering the execution of the order allow us to suspend or cancel said order without notice or compensation. The goods are picked up and approved at our premises. Whether they are sold picked up in the factory, in the warehouse or shipped, even carriage paid, our goods travel at the Buyer’s risk. It is the Customer’s responsibility to check, upon arrival, the condition, quantity or weight of the goods and their conformity to the shipping bill and, in the event of damage or shortage, to make all necessary claims and to confirm these reservations by extrajudicial act or registered letter with acknowledgement of receipt to the carrier within three days of receipt of the goods. We do not accept any responsibility for delays, losses or damages that occur en route, even if they are attributed to faulty packaging or loading. We endeavour to respond positively to our customers’ written requests for storage in the event of postponed shipment or collection at their initiative. However, a contribution to the storage costs may be requested; its amount depends on the volume of products to be stored and the duration of the storage.

6. RETENTION OF TITLE
All our goods are sold with reservation of ownership, until full payment of the price, under the terms of the laws of 12 May 1980 and 25 January 1985. The buyer is personally obliged towards the seller not to dispose of the purchased goods by any other means, neither in full ownership nor by pledging them, before full payment of the price. The risks are borne by the Buyer from the time of delivery. In the event of non-payment of a single instalment, the sale will be cancelled by operation of law, following a formal notice sent by extrajudicial act or registered letter which has remained without effect. If the buyer refuses to return any unpaid goods, a simple summary order shall be sufficient to rescind the sale and authorise the goods to be taken back. The purchaser undertakes to return the goods without delay and at their own expense. Advance payments shall be retained by the Seller as a penalty clause. In the event of resale or processing, the Buyer undertakes, at the Seller’s first request, to assign all or part of the claims acquired against the sub-purchasers, up to the amount still due.

7. CLAIMS
Any claims regarding the condition and quantity of the goods, excluding any transport dispute, must be made immediately upon delivery or collection from our establishment. With regard to quality, our liability is limited to the replacement of parts that we have recognised as defective. Non-standard orders cannot be cancelled, for whatever reason, once they are in progress.

8. RETURNS
Any return of material is subject to our prior agreement expressly formulated by our company. Packaging and transport costs shall be borne by the buyer. The return request must be formulated at the latest within 8 working days following acceptance of the material by the buyer. The returned material must be in a strictly new condition.

9. WARRANTY, LIABILITY AND DURABILITY OF RANGES
8 years for our seats from the week of shipment. The batteries used in our electric versions are guaranteed for 12 months in compliance with the conditions of use stipulated by Navailles on the instructions for use of medical products equipped with batteries. Seat and backrest covers are not covered by the warranty.
To determine the exact date of shipment, a 6-digit number appears under each seat and also on the main components:
- The first two digits correspond to the installer’s number - The next two, to the week of manufacture
- The last two, to the year of manufacture
The warranty shall only apply to functional defects or faulty workmanship if the equipment has been transported, stored and used normally. The warranty shall not apply to defects whose cause is subsequent to shipment of the goods, particularly in the event of poor maintenance, poor handling, poor installation or repairs carried out by the Customer.
The warranty is limited exclusively to replacement of parts found to be defective by original parts.
In order to benefit from this guarantee, the Buyer must notify us, in writing, of the defects that have appeared in the material sold, and follow the instructions of our technical department.
Unless otherwise agreed, the warranty does not include packaging and transport costs.
No repairs carried out, without our agreement, by the Customer or on their behalf will be covered by our Company.
Colour conformity: it is technically impossible to guarantee absolute colour conformity from one dye bath to another.
These deviations cannot constitute a reason for dispute or refusal of the goods.
The tools built or purchased especially for the execution of our customers’ orders shall always remain the property of our company, notwithstanding any advances or contributions received from the said customers on the costs of establishing these tools. For products with the NF Environnement label, Navailles undertakes to supply original functional elements, or elements with equivalent functions, for a period of five years after the date that production ceases.

10. PROHIBITIONS
As our products are covered by patents and registered designs, they cannot be exported outside mainland France without our agreement.

11. JURISDICTION
Exclusive jurisdiction is given to the Commercial Court of Mont-de-Marsan, which has sole jurisdiction, even in the case of a warranty claim, multiple defendants and notwithstanding any clauses to the contrary.
