Note[1]: The illustrated fabric colours may vary slightly from actual fabric supplied. This occurs due to the four colour printing process. However every attempt has been made to make them as accurate as possible. Our Policy of continuous improvement means that we reserve the right to change and modify designs without prior notice. Note[2]: Measurements may vary +/- 2° or +/- 5mm due to manufacturing tolerances

CLINNOVA Clinical Range

The New Market-Leading Range of Clinical Couches for Patient Examination and Minor Treatment Procedures

SEERSMEDICAL

Introduction

In this new brochure we cover a wide range of patient examination furniture for various medical examinations and treatments. The CLINNOVA design was started in 2018 to celebrate the 10th anniversary of **SEERS** Medical, in an effort to create a brand new range of market-leading treatment tables and examination couches. We listened to experts and professionals who use **SEERS** products every day to develop additional features and benefits not previously available on UK manufactured treatment couches.

With the management and control of our own assembly line at our premises in Debenham, Suffolk in the UK, our couches comply to the CE medical devices directive 93/42/EEC, ensuring we supply high quality products every time. We trust you will experience this yourself when you purchase a **SEERS** Medical product.

SEERS Medical are accredited with ISO 13485:2016, the Quality Management System for Medical Devices.

Technical Information

At **SEERS** Medical we are using state of the art design tools, such as 3D solid modelling and in house rapid prototyping, to assist us in getting new designs into development and manufacture. Whilst designing new products, all manufacturing capabilities available are taken into consideration, such as CNC wood cutting, laser profiling and robot welding, which deliver reliable build quality and repeatability of accurate components, time after time. A typical innovative use of these processes is evident in a high loaded components such as the ram bracket, a common item on many **SEERS** couches, where using laser profiling we have been able to make the parts interlock, adding immense strength, even before welding! This is typical of the attention to detail that we pride ourselves with, and sets us apart from other couch manufacturers, giving us confidence in the reliability and longevity of the products we manufacture.

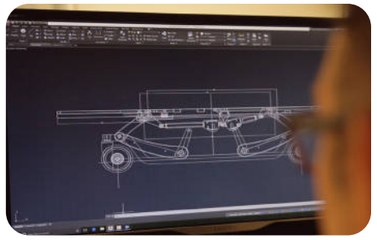

Mechanical Safety & Load Testing
All **SEERS** Medical products have been tested to the applicable EN 60601-1:2006+A12:2014 (E) the General requirements for basic safety and essential performance. Our couches have been thoroughly tested with a two and a half times safe working load (in excess of 600Kg loaded evenly, for in excess of one hour, to prove load support capability without failure. Our products are tested in accordance to Clauses 9.8.3.2-3 Static Forces of EN60601-1:2006 Not only do our products have high safe working loads (typically 240Kg), but our products also lift the rated safe working load from the minimum height to the maximum height smoothly.

Electrical Safety
All **SEERS** Medical products comply to EN 60601-1:2006+A12:2014 (E) the General requirements for basic safety and essential performance. In addition, the actuation and control systems used on our products are marked with the UL mark, demonstrating compliance to UL60601-1 and CAN/CSA-C22.2 No. 601.1-M90, meeting the requirements for USA and Canada. The actuation control system is also marked with approval to C-ETL-US No. 3154358.

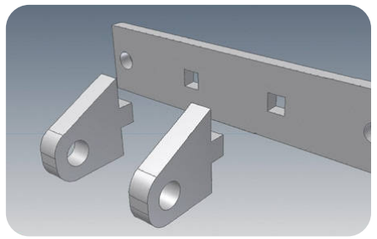

CE Marking & Quality System
SEERS Medical operates a Quality Management System in accredited and approved to ISO 9001:2008. **SEERS** Medical products comply with the Essential Requirements in Annex I of EC Directive 93/42/EC, with all relevant design, production records, risk assessments, product testing and labelling information recorded in the documentation file labelled the "Technical File". All products carry a unique serial number for trace-ability of build date, model number and associated build records.

Flammability
The upholstered couch sections satisfies flammability requirements to the standards of BS 7176:1995 (medium hazard) using ignition sources 0 (cigarette), 1 (gas) as defined in BS EN. 1921-1 and 2 and 5 (crib) BS 5852:1990.

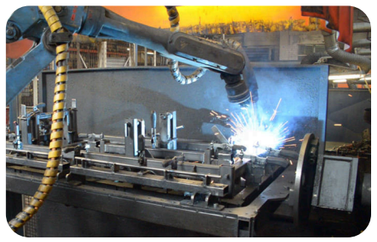

Warranty
The variable height couches detailed in this brochure have a lifetime frame warranty and five years warranty on all other components.

CLINNOVA Clinical 2 Section

Low Transfer Height | Anti Bacterial | 265kg

A very strong and rigid couch available with a wide range of accessories. Suitable for supporting very heavy patients for examination and minor treatment procedures.

Models

See Page 6-7 for available models

Model NV2570-PRM
Colour Canard

Standard Features

- Strong & sturdy design, supporting & lifting patients up to a maximum weight of 265Kg (583lbs)
- Gas assisted or electric backrest adjustable from -20° to +80°
- Anti-trap gas assisted backrest prevents risk of crushing and harm to patient, user or furniture
- Hydraulic pump action or electric height elevation
- Variable height range of 46 to 95cm for individual working heights
- Linked retractable wheels with adjustable foot for uneven floors
- Lock & Go transport mode for easy moving
- Purpose-made precision bearings ensure quiet, reliable operation and increase product life expectancy
- Frame design enables use of mobile hoist
- Electric models include a hand switch as standard
- Laser cut fixing points to easily retrofit approved accessories
- Anti-microbial paint additive on framework prevents growth of bacteria, fungi and viruses
- 70cm wide Easy Clean Upholstery conceals all visible staples
- Choice of Standard or Standard+ upholstery colours

Optional Accessories

6004	Breathing hole and plug
9001	Perimeter foot switch *(NV2560 only)*
6200	Single foot switch *(NV2560 only)*
6207	Double foot switch *(NV2570 only)*
9002	Side support rails (Pair)

SEERSMEDICAL

Optional Accessories

6200 / -1WF

Single foot switch option (alternative to standard single hand switch).

6207 / -2WF

Double foot switch option (alternative to standard double hand switch).

6209 / -3WF

Triple foot switch option (alternative to standard triple hand switch).

6001 / -EPFS

The perimeter foot switch is a "hands free" foot operated system for height adjustment. Medicare 2 & 3 sections only.

6057

Battery back-up available for most electric operated models.

6052 & 6053

An easy to clean protective base frame cover that conceals the moving parts of the framework.

6002 & 6003

Fold-down side support rails for 2 & 3 section couches, providing patient support and security.

NV9002P

Upholstered cushions can be added to the side support rails for additional comfort, support and protection.

If you have any queries on any of the optional accessories listed above please contact us for further details. Please note some of the accessories are supplied as standard with specific couches so please ensure you check before purchasing your chosen product as all other options come at an additional cost.

6041

Side support loops provide patient support and security and are easily removable.

6054

Telescopic IV pole has fixing points on both sides of the couch and is easily adjusted to the required height.

6005

The paper roll holder provides a protective barrier between the patient and the upholstered surface.

6004

Breathing hole & plug for improved patient comfort for prone treatments.

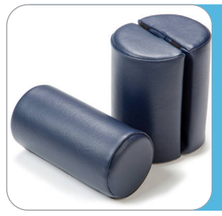

6007

The head support cushion is easily attached to the couch and can also be used as a support for lower limbs.

6006

The upper limb support has multi-angular adjustment and can be fitted to either side of the couch.

5008

The knee roll support set is an ideal accessory for supporting limbs during medical procedures.

6020

A light weight free-standing adjustable leg support for lower limb procedures. Supplied with carrying case.

6044

Traditional lithotomy stirrups for gynaecology procedures.

6045

Leg supports for gynaecology procedures. Fully adjustable for patient comfort and security.
