INTRODUCTION TO THE CATALOGUE

Thank you for your interest in Surtex sterilisation instruments and Surticon Sterile Container System. We remain committed to providing the highest quality products and customer service.

In this special catalogue you will find a comprehensive range of sterilisation instruments & Surticon Sterile Container System, which have been developed following detailed consultation with leading CSSD experts. Surtex instruments highly recommend use of these sterilisation instruments & Surticon Sterile Container System to achieve optimal sterilisation results for all your surgical instruments.

We appreciate your patronage and look forward to a successful relationship with you.

ABOUT SURTEX INSTRUMENTS

Surtex Instruments is a privately owned medical technology company dedicated to innovation and excellence in crafting of surgical instruments. The company started as a specialist in reconstructive surgery instruments and based on its success and innovative drive gradually expanded to cover a vast range of surgical instruments.

We now manufacture over 8,000 surgical instruments and offer innovative solutions in trauma, gynecology, cardiovascular, microsurgery and dental surgery. All our products are available to view online where you can download our entire range of catalogues or request a printed version.

SURTEX QUALITY STANDARDS

In European Union medical devices are subject to a series of uniform laws and the EC directive places rigid demands on surgical instruments. Surtex Instruments is proud to claim that we have always surpassed the legal requirements to ensure that each instrument reaching the surgeons hand is indeed a testament to surgical craftsmanship.

We are **BS EN ISO 13485:2016/ISO 9001:2015 (SGS UK)** certified and **CE** approved to ensure compliance with the standards defined in line with medical devices directive **93/42/EEC.**

WHY IS SURTEX FOCUSED ON INSTRUMENTS QUALITY?

Surgeons are highly talented and skilled individuals. They operate under significant time constraints and are required to make split second decisions while performing complex operations. At Surtex we understand that in such a scenario the surgeon requires tools that are not just fit for the purpose but are reliable, dependable and crafted by a company that has a track record for relentless pursuit for excellence in the making of surgical instruments.

AFFORDABLE QUALITY

Surgical instruments represent a significant proportion of hospital's total assets. Hospitals and health centers are often required to minimize costs of surgical instruments without impacting quality or patient's health. Decision makers tend to respond via group purchasing contracts & multiple quotes to shop around for the lowest price. However this approach has significant drawbacks as numerous instrument companies have focused towards competing on price alone with a disregard towards instruments quality while claiming their instruments to be guaranteed and free of defect.

The outcome for the buyer being a perceived notion of a quality instrument, which is actually little more than a knock-off and delivers only poor value for money.

At **Surtex Instruments** our success has been based on helping customers navigate successfully through the insrument procurement process by identifying real value for money through fair comparison. We believe that quality should be affordable and you should not pay too much for over priced brands and neither should you pay too much for a low quality instrument.

LIFE TIME WARRANTY

We encourage our customers to calculate lifetime costs prior to making purchase decisions and investing in surgical instruments.

Surtex Instruments are guaranteed for life* against manufacturing defects of material and workmanship. This means we will repair or replace free of charge any surgical instrument that does not meet its functional requirements when used for its intended purpose and maintained properly.

SURTICON™
Sterile Container System

Crafted to Excellence

Surticon™ Sterile Container System

BioClean™ | BioFree™

The locking mechanism of the lid can stand stationary in every position upto 180°.

The silicone gaskets of the lids ensure security of the sterilization process.

Silicone handle are available in six different colors.

The security seals are removed only while opening the containers lids to prevent unauthorized use.

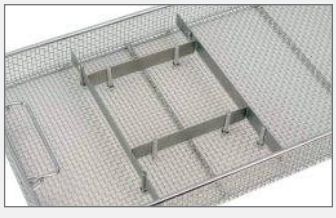

The colored identification labels of the containers are changeable.

The fixation clamps for holding the cylindrical instruments are available in different sizes.

The locking mechanism of the lid can be used as the lid handle.

The plates and holding pins facilitate separation inside the wire mesh basket kits as desired.

The silicone mats, firmly hold micro instruments in their place.

The containers can be stacked on top of each other during storage. (See user manual).

Spiral holders, hold the instruments securely.

The locking latches of the filter holders facilitate quick change of filters.

Surticon™ Sterilization Container Production Process

Starting form production to distribution, Surticon™ Sterilization Container Systems are manufacured through several processes to provide durable and long-lasting products.

Production

After going through forging, pressing, polishing and anodizing processes, container parts are sent to the assembly line.

Assembly

On the assembly line, depending on the model, and average of twenty to thirty parts are assembled through safety checks at regular intervals.

Review

Workmanship and other defects on the containers are checked and water-impermeability tests are carried out.

Packaging

The containers are safely packaged to be damage-proof.

BioFree™ Sterilization Mechanism For Surticon BioFree™ Sterile Container Systems

1

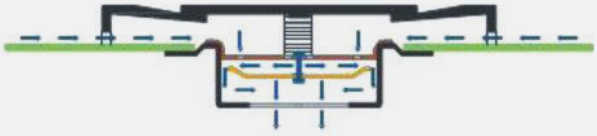

Before sterilization the valves are in relax position.

2

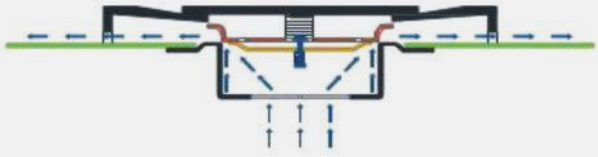

During sterilization the valves open completely by vacuum to evacuate dry air out of the container.

3

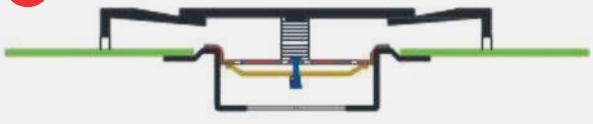

At the end of sterilization cycle the valves then open in reverse direction by vacuum and the sterilization cycle completes.

4

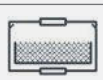

At the end of sterilization cycle the sterilizator equates the pressure level and the valves of BioFree™ model close down.

5

After sterilization the valves go back to relax position.

Compliance scheme of Surticon Sterile Container System for steam sterilization procedures as per DIN 58953, part 9 (in accordance with the May 1987 issue)

Explanation of Symbols: ⊕ Applicable ⊖ Not Applicable ○ Limited Application

1) In order to avoid mistakes with regards to service, operation and/or when loading the sterilizer, please refer to table 1 for correct or wrong combination of sterilization containers for standardized steam sterilization procedures.

2) Only sterilization containers guaranteeing evaporation or discharge of condensate are suitable above.

3) Gravitation procedures having no drying device do not guarantee a sufficient after-drying effect.
