comprehensive solutions for healthcare providers

ZARYS INTERNATIONAL GROUP

We are a producer of disposable medical equipment and a provider of comprehensive healthcare solutions. Established in 1989 as a small family-owned business, today we ensure that **our products reach every place where they are needed.** We are building our international presence through subsidiaries across Europe and a dynamic export team. We supply hospitals and medical institutions, delivering medical devices to more than 70 countries worldwide. ZARYS International Group meets even the most demanding needs of customers **around the globe.**

solutions made in Poland

Our modern production facility in Zabrze features two key areas:

- **Cleanroom – 600 m²**: a controlled environment dedicated to the production of sterile surgical and procedure kits, ensuring the highest standards of cleanliness.
- **Sewing Facility:** dedicated to the production of high-quality medical and protective clothing, hospital linens, and personal protective equipment.

600 m² cleanroom

ZARYS

40 000 m²
of storage space

Comprehensive Portfolio

Our clients benefit from product groups that ensure **complete supply for healthcare facilities:** from basic medical devices, medical gloves, dressings, and surgical drapes, to advanced surgical kits, and procedure packs.

How do we ensure the availability of medical devices?

The ZARYS International Group logistics center is located in the Katowice Special Economic Zone and is the largest warehouse of single-use medical equipment in Central Europe. A team of 150 employees ensures efficient order processing, preparing an average of 100 shipments per hour.

ZARYS products are used daily in thousands of hospitals worldwide.

200 000
orders annually

02 basic medical devices

BASIC INJECTION EQUIPMENT

30 **dispoFINE** injection needle
30 **dispoGUARD** safety injection needle
31 **dispoSULIN** insulin pen needle
31 **dicoSPIKE** withdrawal cannula
33 **duoNEX** single-use syringe, 2-part, Luer NEW
33 **duoNEX SN** single-use syringe, 3-part, Luer, with needle alongside the syringe
33 **dicoNEX** single-use syringe, 3-part, Luer
34 **dicoNEX** single-use syringe, 3-part, Luer-Lock + amber
34 **dicoNEX** single-use syringe, 3-part, Luer-Lock + amber
34 **dicoNEX** single-use catheter syringe, 3-part
35 **dicoTUBER** tuberculin syringe, Luer with needle alongside syringe
35 **dicoSULIN** insulin syringe, Luer with needle alongside the syringe

BASIC INJECTION EQUIPMENT

36 **SANVIflon** I.V. cannula
36 **easyFLOW IS ECO** infusion set
37 **easyFLOW IS** infusion set NEWNEW
37 **easyFLOW IS PREMIUM** infusion set BESTSELLER
37 **easyFLOW IS** infusion set (dual chamber) BESTSELLER
38 **easyFLOW IS SAFE** infusion set NEW BESTSELLER
38 **easyFLOW IS AMBER** infusion set, amber
38 **easyFLOW IS REG** infusion set with precision flow rate regulator NEW
39 **easyFLOW IS** infusion set NEW
39 **easyFLOW TS PREMIUM** transfusion set BESTSELLER
40 **easyFLOW TS** transfusion set
40 **easyFLOW LINE** extension tube for infusion pump
40 needle-free valve
41 needle-free valve with extension line
41 3-way stopcock
41 3-way stopcock with extension tube
42 cannula stopper

OXYGEN THERAPY

42 nasal oxygen cannula
42 oxygen tubing
43 oxygen mask with tubing
43 non-rebreather mask with tubing
43 multi-vent mask with tubing
44 nebulizer mask with mask and tubing
44 nebulizer with T F/M adaptor, mouthpiece, corrugated tube and tubing BESTSELLER

ANAESTHESIA PRODUCTS

45 endotracheal tube uncuffed
45 endotracheal tube cuffed BESTSELLER
46 reinforced endotracheal tube cuffed
46 intubation stylet
46 tracheal tube introducer curved
46 endotracheal tube holder
47 oropharyngeal airway/guedel airway BESTSELLER
47 laryngeal mask PVC
48 laryngeal mask silicone
48 tracheostomy tube cuffed
48 air cushion anaesthetic mask
49 anaesthetic mask with open seal
49 catheter mount with double swivel elbow connector BESTSELLER
49 dual-limb breathing circuit

SUCTION CATHETERS, STOMACH TUBES

50 suction catheter with vacuum control
50 suction catheter
50 suction catheter with frozen surface
51 feeding tube graduated, with X-ray contrast
51 stomach tube/duodenal tube

UROLOGICAL CATHETERS, URINE BAGS

52 **Foley catheter** 2-way, silicone-coated latex BESTSELLER
53 **Foley catheter** 3-way, silicone-coated latex
53 **Foley catheter** 2-way with tiemann tip, silicone-coated latex
54 **Foley catheter** 2-way, 100% silicone BESTSELLER
54 **Foley catheter** 3-way, 100% silicone
55 **Nelaton catheter** NEW
56 **Tiemann catheter**
56 **Pezzer catheter** silicone-coated latex
57 **urine bag** with sample port 2W BESTSELLER
57 **urine bag** with sample port
57 **urine bag**
58 **urine bag** with absorbent, non-sterile BESTSELLER
58 samples taking urine bag
58 urine bag hanger

GENERAL SURGERY

59 **Yankauer surgical suction cannula** standard CH21
59 **Yankauer surgical suction cannula** bulb tip CH23
60 surgical suction tube
60 surgical suction tube with Yankauer cannula, standard
60 surgical suction tube with Yankauer cannula, bulb tip
61 vaginal speculum Cusco type NEW
61 cervical brush standard
61 cervical brush special

TRADITIONAL DRESSING MATERIALS

68 **GAZA lux** dressing gauze, zig-zag folded
68 **GAZA lux** cutting gauze
68 **GAZA lux S** cutting gauze NEW
69 **KOMPRI lux** gauze swabs BESTSELLER
70 **KOMPRI lux S** without X-ray detectable thread
71 **KOMPRI lux S** with X-ray detectable thread
71 **SERVI lux** gauze lap sponges
72 **SERVI lux S** gauze lap sponges
72 **TUPFER lux** gauze balls
73 **TUPFER lux S** gauze balls
73 **NONVI lux** non-woven swabs
73 **NONVI lux S** non-woven swabs
74 **NONVI lux S** with Y-incision
74 **MULTIabsorb** ABD pads, multi-layer
74 **MULTIabsorb S** ABD pads, multi-layer
75 **elastoLUMENAL** eye pads
75 **elastoLUMENAL S** eye pads
75 **cellPAD** cellulose swabs

ADHESIVE TAPES AND PLASTERS WITH DRESSING

76 **SENSIplast** adhesive fabric tape, white
76 **PLASTIplast** adhesive fabric tape, beige
76 **SOFTplast** adhesive non-woven tape
76 **SILKplast** adhesive silk tape
77 **SILLCOplast** adhesive perforated non-woven tape
77 **FILMplast** adhesive PE tape
77 **POREplast** adhesive perforated non-woven tape
78 **NONVIplast** non-woven plaster with dressing
78 **FABRIplast** fabric plaster with dressing

SPECIAL PURPOSE DRESSINGS

78 **elastopor** adhesive non-woven dressing tape
79 **elastopor E** adhesive non-woven dressing tape
79 **elastopor STERIL** non-woven dressing with absorbent pad BESTSELLER
80 **elastoKIDS STERIL** non-woven dressing with absorbent pad
80 **elastopor IV** non-woven IV cannula dressing BESTSELLER
80 **elastoKIDS IV** non-woven IV cannula dressing
80 **elastopor STERIL D** non-woven dressing with absorbent pad, incision and O-hole
81 **elastoKIDS STERIL D** non-woven swab with absorbent pad, incision and X-hole
81 **elastopor EYE** non-woven eye dressing with absorbent pad
81 **elastoKIDS** colorful kids plasters
81 **elastoSTRIP** wound closure strips, sterile NEW
82 **elastoINJECT** injection plasters with perforation, non-sterile NEW
82 **elastoDOT** injection plasters, non-sterile NEW
82 **elastoNASAL** non-woven nasal cannula fixation plaster
82 **elastoNASAL KIDS** non-woven nasal cannula fixation plast
83 **elastoFIXAL** adhesive tape for catheter tubing fixation
83 **elastoFIXAL KIDS** adhesive tape for catheter tubing fixation
83 **elastoFIXAL Set** adhesive tape for endotra cheal tube
83 **elastoFIXAL TUBE** band for tracheostomy tube fixation
84 **elastoDERM** foil dressing, self-adhesive, sterile NEW
84 **elastoDERM C** adhesive dressing pouch for dialysis catheters

STABILIZING DRESSINGS

85 **elastoBAND BASIC** knitted supporting bandage
85 **elastoBAND KNITT** elastic supporting bandage, knitted
85 **elastoBAND FLEX** elastic supporting bandage, woven
86 **elastoBAND FLEX S** elastic supporting bandage, woven, sterile NEW

86 | **elastoBAND FIX** elastic supporting bandage, woven
86 | **elastoBAND CREPP** cohesive supporting bandage, non-woven
87 | **yellowBAND** cohesive bandage
87 | **elastoNET** elastic tubular net bandage
88 | **orthoNATURAL** orthopedic padding, natural
88 | **orthoSYNTHETIC** orthopedic padding, synthetic
88 | **elastoSLING** triangular sling
89 | **orthoBAND** P.O.P. bandage

SPECIALIST DRESSINGS
90 | **paraffiNET** paraffin gauze dressing
90 | **elastoDERM ROLL** adhesive foil dressing tape NEW
90 | **elastoDERM** dressing without absorbent pad, with "three-stage" application type
90 | **elastoDERM PAD** dressing with central absorbent pad, with "three-stage" application type NEW
91 | **elastoDERM F** dressing without absorbent pad, with "frame" application type BESTSELLER
91 | **elastoDERM F-IV** IV cannula dressing, with "frame" application type BESTSELLER
92 | **elastoDERM IV** IV cannula dressing NEW

ADDITIONAL PRODUCTS
93 | **thermPAD** cold/warm compress
93 | **gynPAD** gynaecological-maternity pad
93 | **Alcohol Prep Pad** gauze pad moistened with alcohol
93 | **thermCARE** rescue blanket, foil, termic
94 | **softCELL** cellulose wadding, non-sterile NEW

ZARYS

Anti-wrinkle effect proven in clinical trials*

*The mediCARE Hydra+ glove shows better anti-wrinkle action compared to a traditional nitrile gloves, with visible wrinkle reduction after just one day of use and a gradual improvement throughout the study.

Almond oil

regenerates, moisturizes, slows down the skin aging process, smoothes, firms, helps remove dead cells, brightens the skin, soothes irritations and accelerates the healing of skin lesions, strengthens the skin's hydro-lipid coat

Vitamin E

a natural antioxidant, the vitamin of youth - fights free radicals and prevents the formation of wrinkles, provides long-lasting moisturization

Glycerin

moisturizes, improves the appearance of the skin, smoothes, soothes irritations

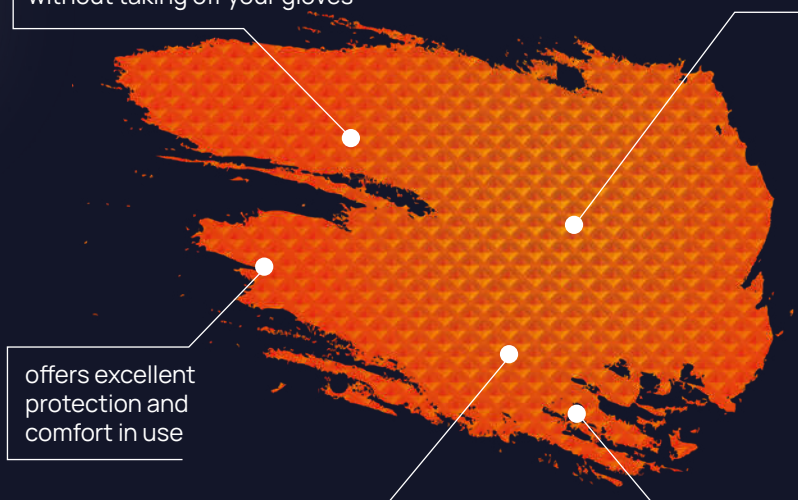

Gripzzly by ZARYS

choose strength and protection

Gripzzly gloves are made of high-quality nitrile and are characterized by extraordinary strength and thickness. This translates into their durability and increased resistance to all kinds of damage. Gripzzly gloves provide comfort, especially during prolonged and demanding tasks.

diamond texture

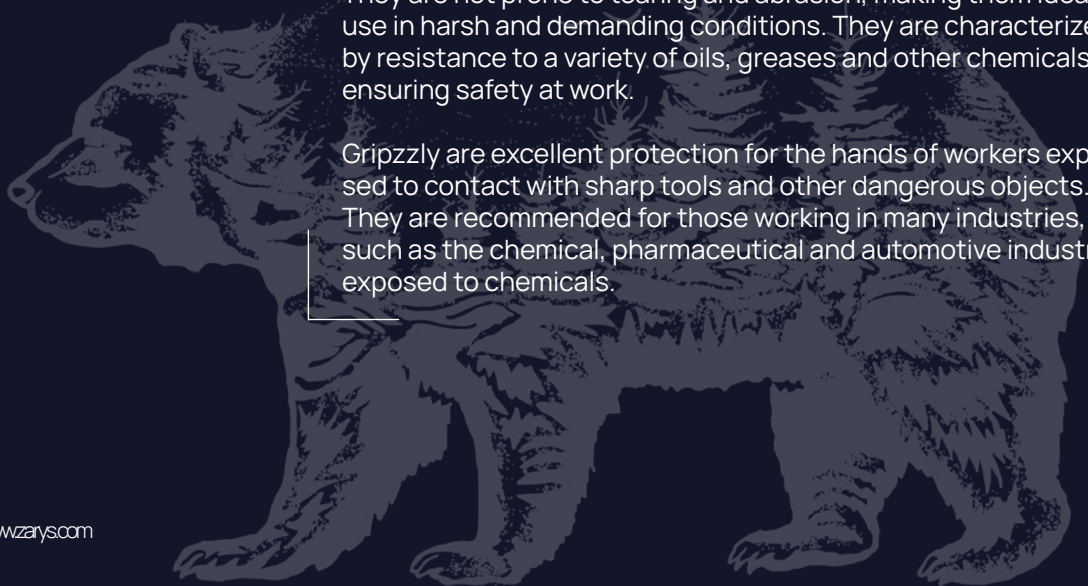

- allows you to use your smartphone without taking off your gloves
- reduces hand perspiration, providing excellent air circulation inside the glove
- offers excellent protection and comfort in use
- makes the glove fit the shape of the hand
- provides a precise and secure grip

work safety

Gripzzly gloves are a guarantee of safety and comfort at work. They are not prone to tearing and abrasion, making them ideal for use in harsh and demanding conditions. They are characterized by resistance to a variety of oils, greases and other chemicals, ensuring safety at work.

Gripzzly are excellent protection for the hands of workers exposed to contact with sharp tools and other dangerous objects. They are recommended for those working in many industries, such as the chemical, pharmaceutical and automotive industries, exposed to chemicals.

Save space, **increase safety**

reduction space up to up 80%

Ease of adjustment

The dispenser can be opened both vertically and horizontally, allowing for easy adaptation to almost any space.

Space saving

The compact dispenser reduces space requirements by up to 80% compared to standard packaging.

Easy access

The packaging ensures easy access to gloves and optimal storage.

Sustainability

Smaller packaging means lower cardboard consumption, contributing to waste reduction and a lower environmental impact.

safeCARE

ZARYS

The safeCARE surgical glove packaging system is a breakthrough in space management and hygiene in medicine. The compact dispenser **holds up to 50 pairs of** sterile gloves, **reducing space requirements by up to 80%** compared to standard packaging for this type of product.

SafeCARE surgical glove packaging not only ensures **easy access and optimal storage,** but also helps maintain **high standards of hygiene and safety by** protecting against contamination, damage, and contamination.
They also offer usage control, enabling **efficient inventory management.**

Time savings and increased work efficiency

An additional opening for returning unopened pairs of gloves saves time and increases staff efficiency without having to open the entire package.

Safety and hygiene

The packaging ensures a high standard of hygiene and safety, protecting against contamination, damage, and contamination.

Usage control

Effective inventory management is possible thanks to the glove consumption control feature.

Quantum secure technology

The inner coating of the gloves is an innovative solution that makes them easy to put on both dry and wet hands. **Quantum Secure Technology** reduces friction and improves comfort. The QST coating ensures safety and works in harmony with the structure of the gloves themselves, guaranteeing optimal strength and flexibility while raising hygiene and safety standards.

construction of the syringe

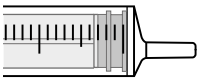

GET TO KNOW OUR SYRINGES

nozzle types:

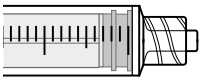

Luer slip, centric

tip of the syringe is pushed into the hub of the needle or other device (e.g. catheters) and twisted. It allows to remove the connection immediately if necessary

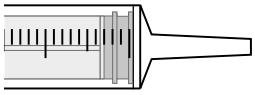

Luer slip, eccentric

eccentric location of the tip is used in procedures involving the administration of drugs and fluids where closer proximity to skin is necessary

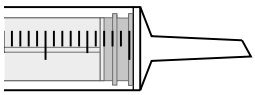

Luer-Lock

designed to secure connection between the syringe and the device (needle, tube, catheter, stopcock, etc.). The tip is equipped with thread to screw in the syringe to prevent disconnection

catheter tip 90°

type of connection used for rinsing (cleaning) catheters, stomach tubes and feeding purposes

catheter tip 45°

nozzle cut at 45 degrees increases the lumen surface

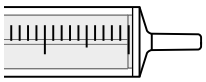

insulin and tuberculin syringes

special design of the plunger seal reduces the drug/liquid residues

1 pc. / hard blister (PVC + lacquered paper)

intermediate packaging
100 pcs

bulk packaging
10 x 100 pcs

features
- needle (stylet) made of stainless steel with back-cut blade
- cannula catheter made of Teflon (FEP), equipped with 4 radiopaque lines

indication
for cannulation of intravenous, peripheral vessels to:
- multiple injections of intravenous drugs
- intravenous infusion of solutions and parenteral nutrition suitable for peripheral veins
- maintain the patient's hydration and / or reduce dehydration if the patient is unable to take sufficient fluid orally
- blood transfusions and blood-like preparations
- ensuring vascular access in the event of the need for rapid drug delivery,
- especially during diagnostic and therapeutic procedures

STERILE EO · LATEX · PHT · 5 YEARS SHELF LIFE

infusion sets

features
- 2-way, sharp spike of the drip chamber with anti-slip surface
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain (easyFLOW IS ECO without the additional holders)
- air-vent with anti-bacterial filter and coloured flap
- dropper: 20 drops = 1 ml ± 0,1 ml
- liquid filter protecting against larger particles

indication
- device for fluid transfer in infusion therapy

1 pc. / foil

indication
- device intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment of an unconscious patient
- device used in hospitals (operating theaters, intensive care units, emergency departments) as well as during pre-hospital care by rescue teams carrying out rescue operations in an unconscious patient

NEW

be well

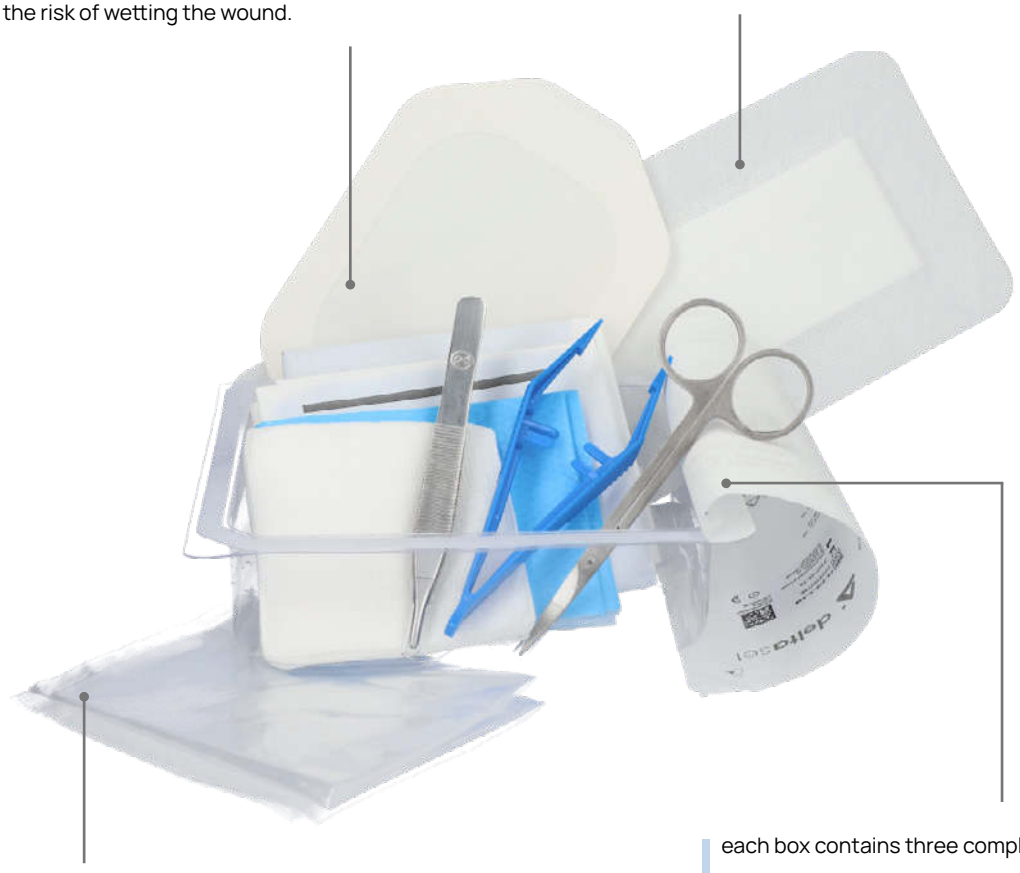

innovative
home post-operative wound care kit

beWell is an innovative home post-operative wound care kit designed with maximum patient comfort and safety in mind. It consists of sterile disposable items and equipment that allow for three changes of dressings for sutured and uninfected post-operative wounds.

What distinguishes the beWell kits?

elastoDERM F foil dressings with „frame" type application system ensuring complete waterproofing, allowing patients to bathe freely without the risk of wetting the wound.

elastopor STERIL non-woven dressings, tailored to the wound size. A special smooth layer of the absorbent pad prevents the dressing from sticking to the wound surface or stitches, ensuring a safe and painless dressing change.

each box contains three complete sterile deltaset kits for changing dressings

medical waste, which facilitate the safe disposal of used materials after dressing changes.

< 5 cm

small wounds

BW-ZWM-ZOP01SN

< 10 cm

medium wounds

BW-ZWM-ZOP02MN

> 10 cm

large wounds

BW-ZWM-ZOP03LN

The box includes:

- 3 sterile deltaset dressing change kits, including:
  - a surgical drape with a cellulose layer (38 x 45 cm)
  - plastic tweezers (12,5 cm)
  - non-latex, powder-free examination gloves
  - gauze swabs adjusted to the wound size
- 3 sterile elastopor STERIL dressings with absorbent inserts
- 3 sterile elastoDERM F foil dressings with „frame”
- 3 bags for medical waste

The deltaset package marked (2) additionally contains:

- sharp-tipped metal surgical scissors
- metal anatomical tweezers

ZARYS

omegapack

surgical sets

Surgical sets are medical devices personalized according to customer needs, dedicated to a selected medical procedure.

omegapack

components of the set

Operating theatre is a specific environment where time is the most valuable factor influencing the success of the operation. It is a place where every minute - or even a second - counts, because it can affect the patient's life. To meet the expectations of medicine, ZARYS introduces operating sets to its offer that meet the highest standards, helping to improve the preparation of the operating theatre before the procedure

advantages of using surgical sets

omegapack

QUALITY
properly selected composition of the set according to individual needs for a specific medical procedure in line with the Customer's order

EPIDEMIOLOGICAL SAFETY
reduced risk of patient infection by minimizing the time of contact of medical staff with devices during the preparation of the theatre and the patient

STANDARDIZATION OF PROCEDURES
correct and schematic conduct during the procedure

one package - one treatment

EASY RECORD KEEPING
optimization of record keeping - one self-adhesive label with the identification of the used set, instead of each used product separately

REDUCTION OF ERRORS
the complete set contains all disposable medical devices necessary for the surgical operation, which eliminates the possibility of errors during the selection of individual products

WIDE RANGE OF PRODUCTS
a wide range of medical devices selected individually in accordance with the Customer's preferences

SAVING THE STOCKS
reduced number of supplies, saving space in the warehouse

TIME
unpacking the set and preparing the operating theatre takes about

30%

less time than selecting individual products and improving work at operating block

REDUCING COST

EFFECTIVENESS
increasing work productivity, so that you can perform more surgical procedures in one day, improvement of work of medical staff

ENVIRONMENT
the amount of generated waste is reduced to a minimum

- one packaging

complete your own set

STEP 1: specialized drape as a key component of each surgical set

STEP 2: other components necessary for a given procedure, such as: dressing materials, disposable equipment, surgical gowns, disposable tools, containers and others

Medical devices under the omegapack brand by ZARYS are operating sets containing complete equipment with all disposable products necessary to perform a given medical procedure to which the set is dedicated. The operating set contains carefully selected disposable components, such as:

- surgical drapes
- accessories, e.g. fluid collection bags, tapes
- covers for equipment
- surgical gowns
- absorbent drapes
- surgical gloves
- gauze balls
- gauze and non-woven swabs bandages
- dressings
- catheters, urine collection bags
- trays, bowls
- specialized components for angiography
- infusion sets
- suction sets
- disposable surgical instruments
- injection needles and syringes
- trocars and laparoscopic instruments
- disposable electrosurgical electrodes and accessories and many more

personal protective **equipment**

PROTECTIVE COVERALL SAFE+
AGAINST CHEMICAL AND INFECTIVE AGENTS
TYPE 4b - 5b - 6b

Personal protective equipments (PPE) are products that protect against one or more risks to the user's health or safety. These products must comply with Regulation (EU) 2016/425 of the European Parliament and of the Council. PPE is classified into three categories according to the degree of risk.

The coverall is a PPE category III in accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council

The category III covers products of complex construction, intended to protect health or life against risks that may cause death or irreversible damage to health.

- made of a laminate (non-woven polypropylene and polyethylene) with a weight of 63 g/m²
- polyester seams additionally covered with tape
- equipped with a hood with elastic trim
- equipped with an elastic waist band, wrists and ankles
- zipper covered with a self-adhesive flap
- available in version with boots

Coverall is personal protective equipment of category III in conformity with Regulation (EU) 2016/425 of the European Parliament and of the Council

EN ISO 13688:2013 Protective clothing. General requirements

TYPE 4 B — EN 14605:2005 +A1:2009

EN 14605:2005+A1:2009 Protective clothing against liquid chemicals. Performance requirements for clothing with liquid-tight (Type 3) or spray-tight (Type 4) connections, including items providing protection to parts of the body only (Types PB [3] and PB [4])

TYPE 5 B — EN ISO 13982-1:2004 +A1:2010

EN ISO 13982-1:2004+A1:2010 Protective clothing for use against solid particulates. Part 1: Performance requirements for chemical protective clothing providing protection to the full body against airborne solid particulates (type 5 clothing)

TYPE 6 B — EN 13034:2005 + A1:2009

EN 13034:2005+A1:2009 Protective clothing against liquid chemicals. Performance requirements for chemical protective clothing offering limited protective performance against liquid chemicals (Type 6 and Type PB [6] equipment)

CLASS 1 — EN 1073-2:2002

EN 1073-2:2002 Protective clothing against radioactive contamination. Part 2: Requirements and test methods for non-ventilated protective clothing against particulate radioactive contamination

EN 14126:2003 + AC:2004

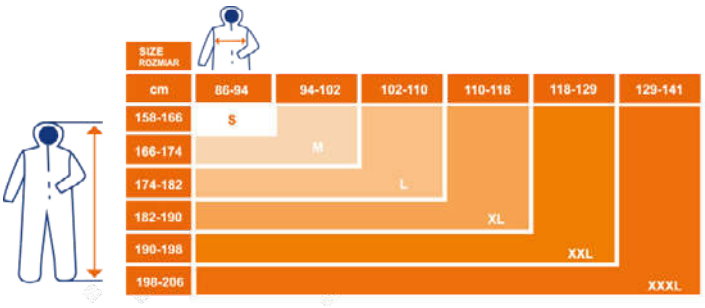

EN 14126:2003 + AC:2004 Protective clothing. Performance requirements and tests methods for protective clothing against infective agents

class 6 Resistance to penetration of contaminated liquids under the influence of hydrostatic pressure
class 6 Resistance to penetration by infective agents due to mechanical contact with substances
class 3 Resistance to penetration of contaminated liquid aerosols
class 3 Resistance to penetration of contaminated solid particles

prevention of surgical site infection

comprehensiveness

ZARYS ALPHAtex sets allow the user to customize products for a specific medical procedure, according to their individual requirements. **Our offer includes a wide range of drapes** of different weights, sizes and shapes, which can also be purchased separately. All materials, used in the production of ALPHAtex products, meet the requirements of current standards and are subject to rigorous quality control.

infection prevention

Prevention of Surgical Site Infections (SSI) is a critical task to ensure patient safety and surgical success. All procedures and preventive measures implemented should be tailored to the type of surgery, as well as to the individual needs of the patient. It is also important to adequately train medical personnel who, by following best practices, ensure that the risk of infection is reduced.

security

SSI occurs most often during surgical procedures where there is a risk of microorganisms entering an open surgical wound.

Microorganisms can come from two types of sources: exogenous causing infection transmitted from external factors such as personnel or medical apparatus, and endogenous leading to infection with the patient's bacterial flora from the immediate wound environment. There are two most common routes of infection: airborne and contact.

Many types of barriers are used to reduce **surgical** site infections, **the most important of which are surgical drapes and gowns.**

ALPHAtex

XL
EN13795
XXL
EN13795 SP

ALPHAtex

surgical drapes and gowns

(nomenclature derives from the standard PN-EN-13795 -1)

Surgical drapes are used to ensure microbiological cleanliness of the working area during surgery and to reduce the risk of bacterial flora migration from the patient's skin to the wound. They are also used to control the spread of bodily fluids.

Surgical gowns are an essential protective barrier. They prevent the transmission of infectious agents from the medical staff to the patient. They reduce the risk of spreading desquamated skin particles in the air in the operating room.

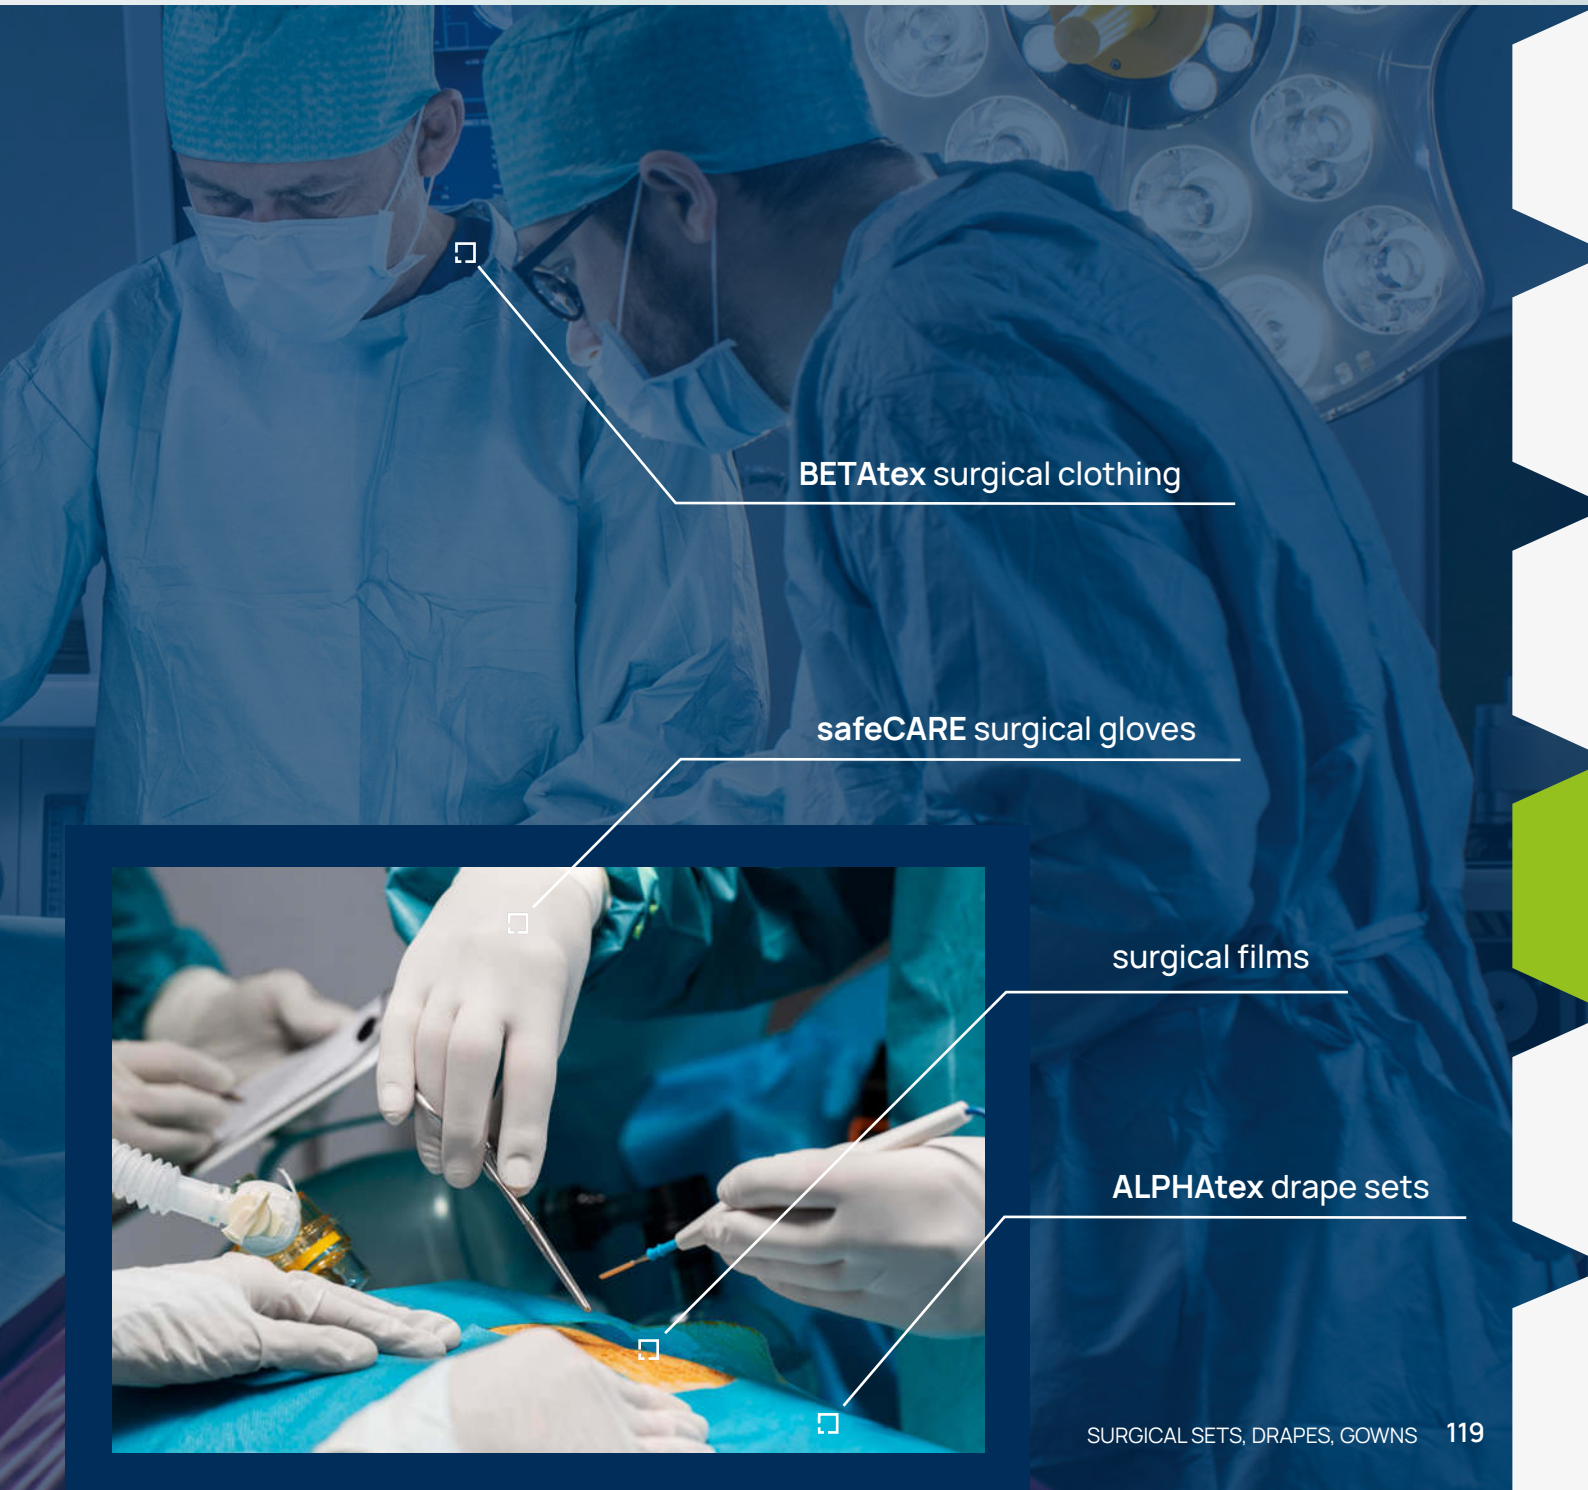

The ALPHAtex brand and its wide range of solutions are the result of over thirty years of ZARYS's presence in the medical market.

Sharing our experience and knowledge, **we are confident that the use of ALPHAtex products ensures comfort, safety, and economic efficiency in daily work in operating theaters.**

comprehensive **operating room protection**

The operating room is the heart of every hospital, where hundreds or even thousands of surgical procedures are performed, during which the skin is opened and incised. This can lead to infections or contamination of the surgical site, which is why maintaining the highest level of safety in operating rooms is crucial.

features of disposable surgical drapes

ALPHAtex

quality
high quality materials

barrier properties
providing adequate protection against microorganisms

absorbency
drapes with high absorbency parameters

sterility
reduces the risk of surgical site infections

durability
good mechanical properties

vapor-permeable
breathable, providing thermal comfort

non-dusty
lighter and non-dusty compared to reusable cotton drapes

pictograms
drapes and wrappers that provide legible pictograms

flexibility
flexible and easy to apply

safe
friendly to the patient's skin -contains no latex or rosin

hydrophobicity
resistant to liquid penetration

hypoallergenic
non-allergenic and non-irritating

communication **packaging**

We use two types of individual packaging: paper-foil type and durable Header Bag with a TYVEC insert that allows sterilization processes. All contain a label with the product name, its graphic representation, and informative pictograms. Additionally, they are equipped with self-adhesive TAG labels for data archiving and information on the opening direction.

double packaging system

ALPHAtex

ALPHAtex product packaging is made according to the highest quality standards. The solutions used allow the user to easily open and safely remove the sterile product needed for the procedure.

Our medical product packaging is designed with safety, hygiene, and contamination protection in mind.

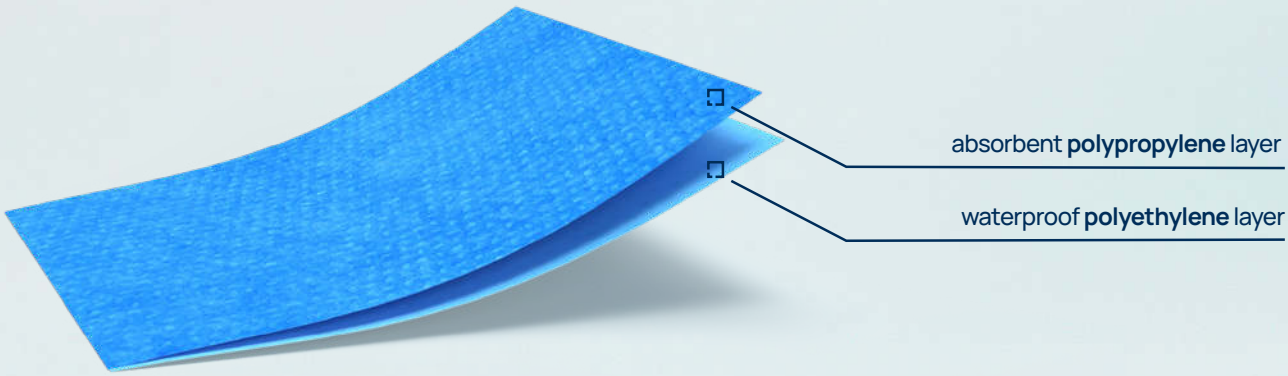

For ALPHAtex surgical drapes, ZARYS International Group uses a double packaging system involving the use of foil bags or smaller cardboard boxes and additional external protection in the form of a corrugated cardboard carton. This is to maintain the sterility of products delivered to the operating theater at every stage of transport.

product lines: surgical field drape system

STANDARD S

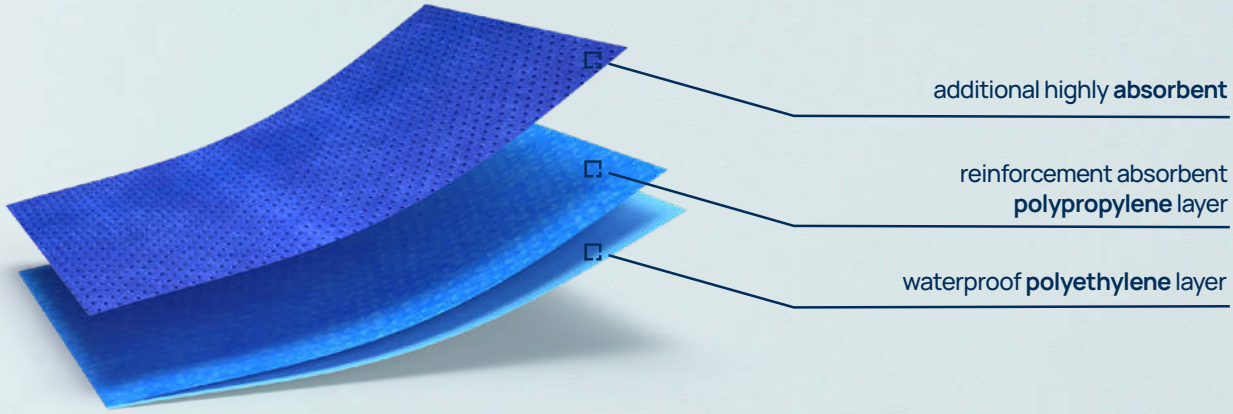

- Procedures with standard or slightly increased fluid levels
- 2-layer material
- Barrier against microorganism penetration
- Absorbent and waterproof material over the entire surface
- Tensile and puncture strength
- Paper-foil packaging
- 4 self-adhesive TAG labels

STANDARD+ S+

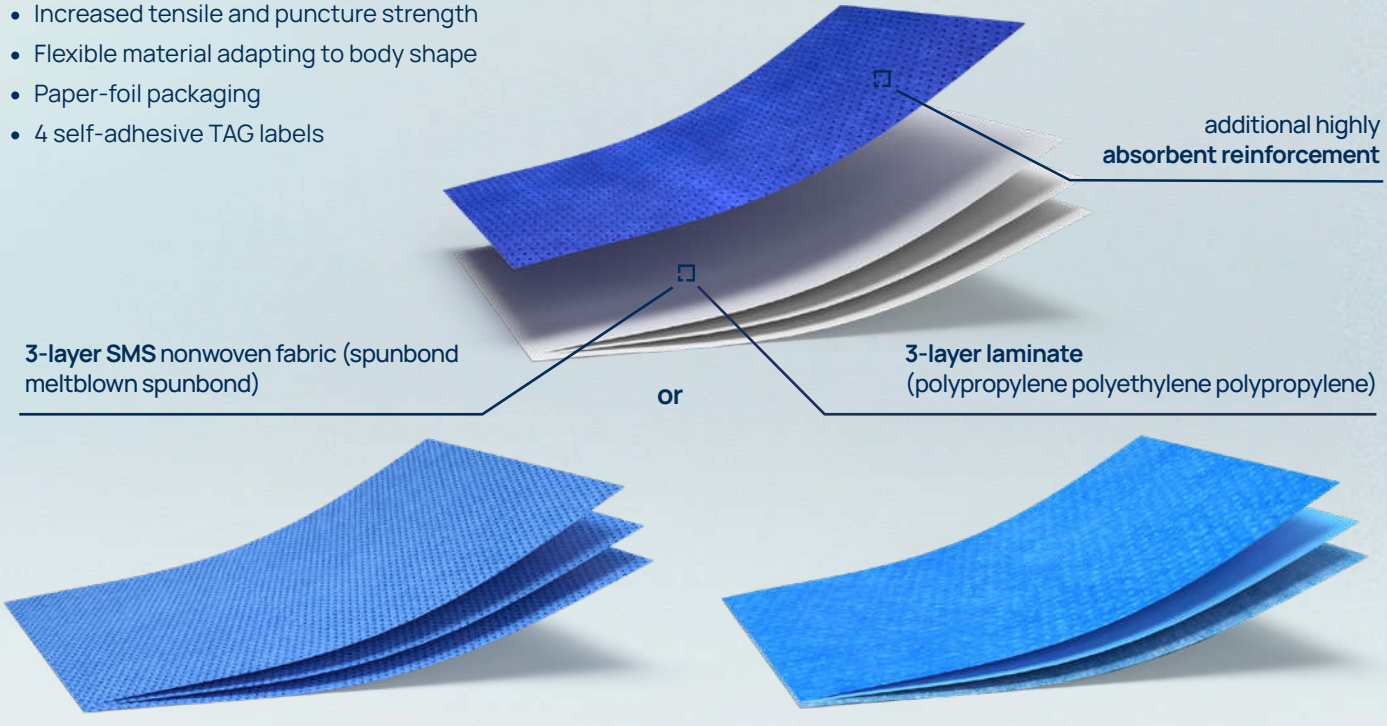

ALPHAtex

- Procedures with high fluid levels
- 2-layer material with reinforcement
- Barrier against microorganism penetration
- Absorbent and waterproof material over the entire surface
- Additional highly absorbent reinforcement in the critical zone
- Increased tensile and puncture strength
- Paper-foil packaging
- 4 self-adhesive TAG labels

COMFORT C

- Procedures with very high fluid levels
- 3-layer material with reinforcement
- Barrier against microorganism penetration
- Absorbent and waterproof material over the entire surface
- Additional highly absorbent reinforcement in the critical zone
- Increased tensile and puncture strength
- Flexible material adapting to body shape
- Paper-foil packaging
- 4 self-adhesive TAG labels

absoform

A solution for comprehensive patient protection and comfort

- absorbent pad with **superabsorbent**
- composed of **five layers**
- ensures permanent **retention of MRSA and E.Coli bacteria**
- **breathable**
- **possibility of sterilization** with ethylene oxide
- **single-use**

patient contact layer

patient contact layer to ensure passage of urine or body fluids into the pad

cellulose layer

cellulose layer surrounding the absorbent pad

absorbent insert

absorbent insert with superabsorbent to absorb body fluids

outer layer

outer layer to allow airflow

Absoform underpads are a solution that combines effective absorption with patient comfort. Thanks to the five-layer construction and the use of superabsorbent, they not only effectively retain fluids and bacteria, but also ensure optimal air circulation, which helps prevent bedsores.

The skin-friendly surface and effective odor reduction increase comfort. The resistance of up to 230 kg and the ability to safely transport the patient make the absoform a reliable tool in daily medical practice. It is a combination of innovation, safety and comfort.

high level of safety

The pads are especially recommended for immunocompromised patients and those with extensive wounds, where protection against potential pathogens is crucial. They stop MRSA and E. coli bacteria, guaranteeing a high level of safety.

absoform

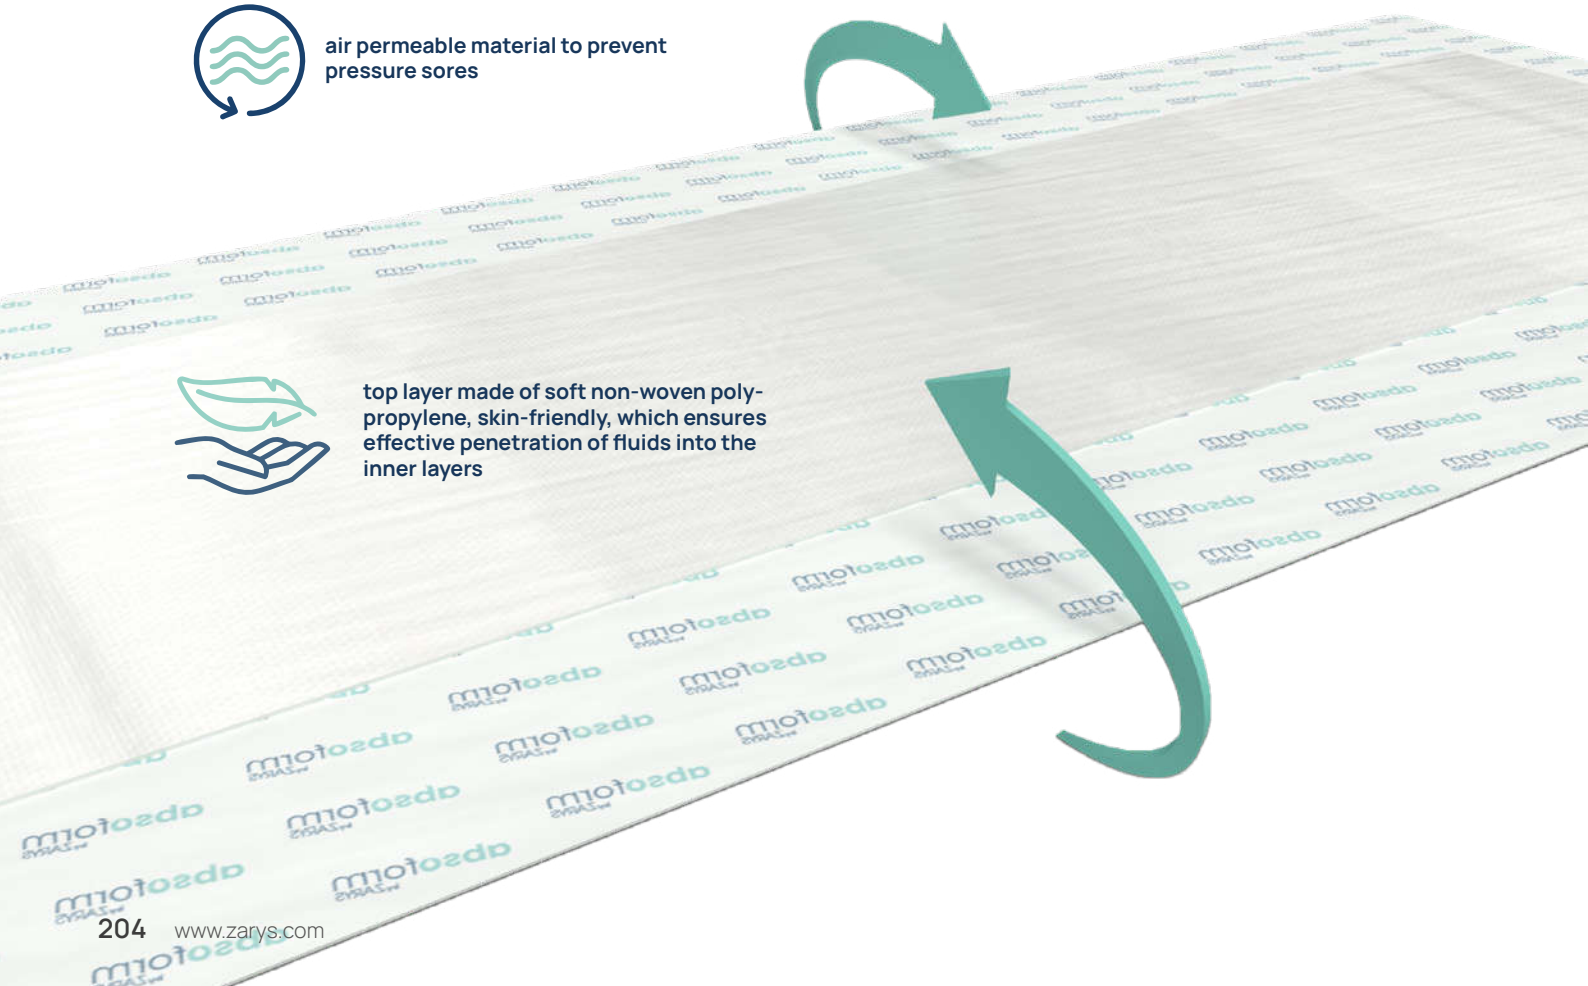

Absorbent underpad, non-sterile

The absoform underpads are a simple and versatile solution that works well in the daily operations of hospitals, nursing homes, emergency departments, gynecological wards and palliative care.
